*Destination Dissertation* Sonja K. Foss  
2025-04-15 Demystifying and charting a path from concept to completion, *Destination Dissertation* has helped thousands of doctoral students emerge on the other side of their dissertation as successful researchers. The third edition of this groundbreaking guidebook supplements the core 29 steps of the dissertation with up-to-date discussions of citation management and the pros and cons of artificial intelligence in the research world. A new final chapter looks beyond the dissertation to springboard researchers into future publishing and career opportunities.

*The New Faculty Member* Robert Boice  
1992-04-10 For the first time in decades, most American campuses are in the midst of hiring

large groups of new faculty. As competition for the most qualified candidates increases, institutions must work harder than ever to attract and retain the best and most diverse prospects. This often requires investing considerable resources in recruitment and hiring--and makes it imperative that new hires are not lost to competitors or to unhappy or unproductive beginnings. In this book, Robert Boice offers a range of proven support strategies designed to help new faculty thrive--from campuswide programs for nurturing newcomers to projects that help them to help themselves. Boice identifies the major challenges facing most new faculty--teaching, scholarly writing, and simply fitting in as colleagues--and provides tested solutions for helping them cope. He outlines a structured mentoring program to

build collegiality through social support networks. And he presents specific techniques for helping new faculty find time, fluency, and balance as writers, including advice on dealing with editorial evaluations or rejections. The author also details a variety of self-help projects, including exercise and mood management groups run largely by new faculty, as well as faculty handbooks and newsletters. And perhaps most important, he tells how to gain the crucial support of department chairs, deans, and other administrators, secure funds to get programs off the ground, and keep new programs manageable and successful.

**Becoming an Academic Writer** Patricia Goodson 2023-07-26 With its friendly, step-by-step format, the Third Edition of *Becoming an Academic Writer* by Patricia Goodson helps readers improve their writing by engaging in

deep, deliberate, and daily practice. Featuring 50 exercises, this guide is organized so readers can either work through exercises in order, or focus on specific areas.

Effective Practices for Improving Teaching

Michael Theall 1991

Advice for New Faculty Members Robert Boice

2000 *Nihil nimis* is a guide to the start of a successful academic career. As its title suggests (nothing in excess), it advocates moderation in ways of working.--From publisher description.

**Air & Light & Time & Space** Helen Sword 2017-04-17 From the author of *Stylish Academic Writing* comes an essential new guide for writers aspiring to become more productive and take greater pleasure in their craft. Helen Sword interviewed one hundred academics worldwide about their writing background and practices. Relatively few were trained as writers, she found, and yet all have developed strategies to thrive in their publish-or-perish environment. So how do these successful academics write, and

where do they find the “air and light and time and space,” in the words of poet Charles Bukowski, to get their writing done? What are their formative experiences, their daily routines, their habits of mind? How do they summon up the courage to take intellectual risks and the resilience to deal with rejection? Sword identifies four cornerstones that anchor any successful writing practice: Behavioral habits of discipline and persistence; Artisanal habits of craftsmanship and care; Social habits of collegiality and collaboration; and Emotional habits of positivity and pleasure. Building on this “BASE,” she illuminates the emotional complexity of the writing process and exposes the lack of writing support typically available to early-career academics. She also lays to rest the myth that academics must produce safe, conventional prose or risk professional failure. The successful writers profiled here tell stories of intellectual passions indulged, disciplinary conventions subverted, and risk-taking

rewarded. Grounded in empirical research and focused on sustainable change, *Air & Light & Time & Space* offers a customizable blueprint for refreshing personal habits and creating a collegial environment where all writers can flourish.

First-order Principles for College Teachers

Robert Boice 1996 Based on his many years of experience teaching new faculty about teaching and writing, Boice presents ten basic, interrelated principles that underlie effective teaching. These principles address attitudes as well as actions. Unique in its approach, the book is a valuable resource for both novice and experienced teachers.

**Writing Brave and Free** Ted Kooser 2006

Sometimes setting pen to paper requires bravery, and writing well means breaking free of the rules learned in school. Liberating and emboldening the beginning writer are the goals of Ted Kooser and Steve Cox in this spirited book of practical wisdom that brings to bear

decades of invaluable experience in writing, teaching, editing, and publishing. Unlike "how to write" books that dwell on the angst and the agony of the trade, *Writing Brave and Free* is upbeat and accessible. The focus here is the work itself: how to get started and how to keep going, and never is heard a discouraging word such as "no," "not," or "never." Because of the wealth of their experience, the authors can offer the sort of practical publishing advice that novices need and yet rarely find. Organized in brief, user-friendly chapters--on everything from sensory details to a work environment, from creating suspense to revising and taking criticism--the book allows aspiring (and practicing) writers to dip in anywhere and find something of value.

*Publish, Don't Perish* Joseph Moxley 1992-08-30  
Expressing a strongly positive view of the value of academic publishing that reaches far beyond what is implied by the book title, Moxley offers informed suggestions to faculty members for conceiving, developing, and publishing scholarly documents as books or journal articles. His book discusses the composing processes of successful writers and provides specific guidelines for various types of writing, including abstracts, book proposals, and grant proposals. Writers are instructed in applying the standards and techniques used by professional editors for evaluating and editing manuscripts. Moxley also addresses political and economic factors that impinge on what is written and published and suggests ways to involve institutions and professional organizations in motivating scholarship writing and publishing.

**Writing on the Edge** 1993

Professors as writers (a self-help manual) Robert Boice 1988

*Professors as Writers* Robert Boice 1990 Here is a proven book to help scholars master writing as a productive, enjoyable, and successful experience -- Author, Robert Boice, prepared this self-help manual for professors who want to write more productively, painlessly, and successfully. It reflects the author's two decades of experiences and research with professors as writers -- by compressing a lot of experience into a brief, programmatic framework. Like the actual sessions and workshops in which the author works with writers, this book admonishes and reassures. In the innovative book lies the path for sustained, highly productive scholarly writing!

**In Our Own Voice** Tina LaVonne Good 2000 Acknowledging that many composition courses are taught by graduate students, "In Our Own Voice" offers a selection of articles about teaching first year writing by graduate students.

By reading a variety of perspectives about the realities and experiences of teaching writing, graduate students become better prepared for the composition classroom. The collection attempts to strike a balance between the theoretical and practical issues composition teachers face, and functions as a resource for pedagogical theories and practical ideas while at the same time problematizing traditional and currently held beliefs and definitions. The essays are arranged according to topic and attempt to speak to each other, while acknowledging that there is no right or wrong method when it comes to teaching. For anyone interested in the teaching of writing.

*How Writers Journey to Comfort and Fluency* Robert Boice 1994-08-23 This book, by a psychologist with two decades of investment in writers, depicts his programs for instilling patience, pacing, constancy, and resilience in writing. He shows how writers proceed to comfort and fluency by detailing strategies,

rules, and turning points for a diversity of writers--professional, professorial, and otherwise. The result is a thorough-going discussion of what helps writers and a review of the broad literature that program participants found most helpful.
