Emergency Medical Services, 2 Volumes Jane H. Brice

2021-11-17 The two-volume *Emergency Medical Services: Clinical Practice and Systems Oversight* delivers a thorough foundation upon which to succeed as an EMS medical director and prepare for the NAEMSP National EMS Medical Directors Course and Practicum. Focusing on EMS in the 'real world', the book offers specific management tools that will be useful in the reader's own local EMS system and provides contextual understanding of how EMS functions within the broader emergency care system at a state, local, and national level. The two volumes offer the core knowledge trainees will need to successfully complete their training and begin their career as EMS physicians, regardless of the EMS systems in use in their areas. A companion website rounds out the book's

offerings with audio and video clips of EMS best practice in action. Readers will also benefit from the inclusion of: A thorough introduction to the history of EMS An exploration of EMS airway management, including procedures and challenges, as well as how to manage ventilation, oxygenation, and breathing in patients, including cases of respiratory distress Practical discussions of medical problems, including the challenges posed by the undifferentiated patient, altered mental status, cardiac arrest and dysrhythmias, seizures, stroke, and allergic reactions An examination of EMS systems, structure, and leadership

Resuscitate! Mickey S. Eisenberg, M.D. 2013-05-15 Sudden cardiac arrest is the leading cause of death among adults, yet it need not be fatal. Though survival in most communities is very poor, a few

communities achieve rates as high as 50%. Why are some communities so successful in snatching life from the jaws of death? *Resuscitate!* describes the steps any EMS system can take to improve cardiac arrest survival. It is written for the medical directors, administrative directors, fire chiefs, dispatch directors, and program supervisor who direct and run EMS systems all across the country, and for the EMTs, paramedics, and dispatchers who provide frontline care. This second edition of *Resuscitate!* provides fifteen concrete steps to improve survival. Four steps will lead to rapid improvements at the local level and are relatively easy to implement. Six additional steps are more difficult to implement but also likely to improve survival. The remaining steps recommend changes at the national level. *Resuscitate!* is the official textbook for the Resuscitation Academy, held twice a year in Seattle. Cosponsored by Seattle Medic One, King County EMS, and the Medic

One Foundation, the Academy draws attendees from throughout the world for two intensive days of classes, demonstrations, and workshops to acquire the knowledge and tools to improve survival in their own communities. This new edition includes lessons learned from attendees of the Academy as well as from the faculty's evolving thoughts on how to measure performance and improve survival, one community at a time. It also includes an addendum on the Resuscitation Academy (resuscitationacademy.org). For more than thirty years, Mickey S. Eisenberg M.D., Ph.D. , has played a leading role in developing King County, Washington's emergency response to cases of sudden cardiac arrest, a system recognized as among the very best in the nation. He is a professor of medicine at the University of Washington and serves as the medical director of King County Emergency Medical Services.
