Selenium in Medicine and Biology Jean Nève 1989 The implications of selenium in human pathology were extensively considered during the congress, with an emphasis on those susceptible to selenium deficiency--children, pregnant women, the elderly, subjects with restricted regimens, and inhabitants of low selenium areas. Sixty-seven contributions address new and refined laboratory methods to demonstrate the effects of selenium deficiency and supplementation more precisely. Intervention studies and the possible benefits of selenium supplementation are also explored. Annotation copyrighted by Book News, Inc., Portland, OR

Rheumatology, State of the Art Géza Bálint 1992 Scientists, practicing clinicians, physicians and non-medical professionals attended the above mentioned congress to exchange views both within the frame of the scientific program and also in personal talks and conversations. The free articulation of rheumatic patients, as the central problem of the scientific program was tackled from different directions, with the entire scope of rheumatology presented from basic sciences and research to patient counselling and the activities of the social leagues. The majority of the scientific program concerned the workshops in which hard discussions helped to bring closer the differing views. This publication comprises a collection of the scientific portion of the congress, presenting the plenary lectures and the workshops in a topical order.

Metabolism of Trace Metals in Man: Developmental aspects Owen M.

Rennert 1984 Abstract: A 2-volume reference set (volume 1:

Developmental Aspects; volume 2: Genetic Implications) presents 16 authoritative reviews on a variety of general and specific topics dealing with trace metal metabolism. General aspects of trace elements include; perinatal needs; genetic and developmental implications derived from animal experiments; the general relationship of trace elements in health and disease; trace element needs in growth, sexual maturation, genetic regulation, and in the elderly; and trace elements in human milk. Specific topics discussed are: the role of Cu, Zn, and other elements in ischemic heart disease; the role of Cu in Menke's disease; genetic aspects of Mn metabolism; and the study of various disease states (acrodermatitis enteropathica, idiopathic hemochromatosis, Wilson's disease, and diabetes mellitus).
