Strategic Alliance Management
Brian Tjemkes 2017-09-19

Strategic alliances - partnerships between separate organizations to share resources collaboratively toward mutually beneficial goals - are an important management instrument, but one that is difficult for firms to manage. Among many desirable outcomes, alliances can reduce costs, provide access to new technology, and improve research and development endeavours, though collaborative arrangements come with risks, peril, and adversities. This renewed and re-worked text connects theory to practice to help understand this important business practice. *Strategic Alliance Management* presents an academically grounded alliance development framework, detailing eight stages of alliance development with consideration for specific management challenges. For

each stage, readers are presented with state-of-the-art theoretical insights, evidence-based managerial guidelines and a business case illustration. Additional chapters detail on contemporary alliance management challenges, including co-opetition and business eco-systems. Other chapters highlight the role of alliance professionals, alliance capabilities and paradoxical challenges in alliance relationships. This second edition retains a blend of academic knowledge and practical examples, while updating case examples and adding five new chapters on emerging alliance topics. This book remains vital reading for business students and professionals interested in strategic management.

Competence Development in Controlling and Management Accounting

Stephan Schöning 2023-04-12

The book is considered a guideline for systemic personnel development in controlling of nationally and internationally active companies on the basis of a targeted development of competencies. In particular, the challenges posed by digitalization and globalization are considered and substantiated with the help of empirical studies. Employees and managers in controlling as well as HR managers in companies gain a deeper understanding of the necessity and the components of systematic personnel development. The goals are the formation of high-performance

teams in controlling as well as the identification of personal career paths on the way to top management tasks as CFO. The focus of the personnel development model is on the transfer of the competence-oriented development approach, which, in addition to the traditionally considered technical and methodological competencies, also takes into account social and personal competencies as well as additional digital and intercultural competencies. The book is rounded off by a survey of the current situation, the definition of a target situation to be aimed at, the discussion of suitable further training measures and the monitoring of the level of competency achieved, and illustrates concrete career concepts.
