**Teach Your Child how to Think** Edward De Bono 1993  
Our increasingly complicated lifestyle demands clear and constructive thinking: making decisions, making choices, taking initiatives, and being creative. Watching television for twenty to thirty hours a week, as many children do, results in a passive mind that

can only copy what others are doing (including drugs, sex, and violence). Give your children a better chance in life. Thinking is a skill . . . even a superior brain is wasted without it. You can start to teach your children to think - now. With examples, exercises, games, and drawings, Dr. de Bono, Rhodes scholar and leading authority on the direct teaching of thinking, demonstrates the difference between intelligence and thinking, and provides a step-by-step method for helping children develop clear and constructive thinking. Even one or two thinking habits taken from this book and given to your children may strongly affect their life.

*I Am Right You Are Wrong*

## Teach Yourself To Think Edward De Bono

---

Edward De Bono 1991-04-02 I Am Right, You Are Wrong is THE classic work about choice in business and in life from world-renowned writer and philosopher Edward de Bono. Most of our everyday decision-making tends to be confrontational. Whether in large meetings, one-to-one or even in our own heads, opposite view points are pitted against each other. Ultimately, there must be a winner and a loser. In I Am Right, You Are Wrong, lateral-thinking guru Edward de Bono challenges this 'rock logic' of rigid categories and point-scoring arguments which is both destructive and exhausting. Instead he reveals how we can all be winners. Clearer perception is the key to constructive thinking and more open-minded creativity. In overturning conventional wisdom, Edward de Bono will help you to become a better thinker and decision maker. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought' Sir Richard Branson

Edward de Bono invented the concept of lateral thinking. A world-renowned writer and philosopher, he is the leading authority in the field of creative thinking and the direct teaching of thinking as a skill. Dr de Bono has written more than 60 books, in 40 languages, with people now teaching his methods worldwide. He has chaired a special summit of Nobel Prize laureates, and been hailed as one of the 250 people who have contributed most to mankind. Dr de Bono's titles include classic bestsellers such as Six Thinking Hats, Lateral Thinking, I Am Right You Are Wrong, Teach Yourself How To Think, Teach Your Child How To Think, and Simplicity.

**Thoughtware** J. Philip Kirby 1997-07-21 In an entertaining and engaging style, the authors describe the theory of thoughtware--the type of thinking that is the operating platform of an organization--and its potential to create a new context in which efforts toward change have the

optimum opportunity for success. Part I describes the elements of the old thoughtware of mass production and how it hinders today's organizations. Part II defines elements of the new thoughtware, and Part III explains how to install it in an organization. Annotation copyrighted by Book News, Inc., Portland, OR

**Six Thinking Hats** Edward De Bono 2008 Edward de Bono's Six Thinking Hats is the groundbreaking psychology manual that has inspired organisations and individuals all over the world. De Bono's innovative guide divides the process of thinking into six parts, symbolized by the six hats, and shows how the hats can dramatically transform the effectiveness of meetings and discussions. This is a book to open your mind, unleash your creativity and change the way you think about thinking.

Instructor and Teacher 1983  
**Lateral Thinking** Edward De Bono 1977 THE classic work about improving creativity from world-renowned writer

and philosopher Edward de Bono. In schools we are taught to meet problems head-on: what Edward de Bono calls 'vertical thinking'. This works well in simple situations - but we are at a loss when this approach fails. What then? Lateral thinking is all about freeing up your imagination. Through a series of special techniques, in groups or working alone, Edward de Bono shows how to stimulate the mind in new and exciting ways. Soon you will be looking at problems from a variety of angles and offering up solutions that are as ingenious as they are effective. You will become much more productive and a formidable thinker in your own right. 'If more bankers and traders had read Lateral Thinking and applied the ideas of Edward de Bono to their own narrow definitions of risk, reward and human expectations, I suspect we would be in much better shape than we are' Sir Richard Branson Edward de Bono invented the concept of lateral thinking. A world-renowned

writer and philosopher, he is the leading authority in the field of creative thinking and the direct teaching of thinking as a skill. Dr de Bono has written more than 60 books, in 40 languages, with people now teaching his methods worldwide. 2012-01-20 *Business Gurus* is an essential introduction to business and leadership thinking. A must-read for anyone working in or studying business, *Business Gurus* explains simply and clearly the most important elements from the world's most influential

leadership and management thinkers. All major gurus, both past and present, are featured including: Michael Porter, Tom Peters, Peter Drucker, Michael Gerber, Peter Senge, Jim Collins, Ken Blanchard, Charles Handy, Richard Koch, John Kotter, Richardo Semler, Stephen Covey, Seth Godin and many more. For each of these Gurus, the book explains their background, the main theories for which they are known, the context for these theories, and how they compare to other business thinking. Crucially the book also looks at how each theory works in practise.

*The Path to Perspective* Neil David Martin 2009 The Path to Perspective is nothing short of a manifesto for business in the new millennium, a classic account of why challenging assumptions is the starting point for successful companies in the 21st Century. In his first book Neil David Martin offers fresh and innovative thinking on the struggle to maximise performance in today's challenging business environment. "Experience is

what you get when you don't get what you want. Fix the roof while the sun shines. Short statements make us think. Reality is often very different from how we might first perceive it. Neil's new book explains exactly why perspective is so important to business. Sharpen your thinking tools with "The Path to Perspective". (Richard Grace, Serial Entrepreneur and former Senior Manager at Xerox) Together with a compelling vision of what our organisations could be, The Path to Perspective outlines a convincing case for people-first, values-driven, free thinking business, which begins with rethinking your company's practices and priorities. It is packed with over 40 powerful concepts and a step-by-step plan to help you translate the ideas in this book into meaningful practices for your business. The author also offers us several important and eye-opening insights, including: - Why most companies still struggle to differentiate, to attract and

retain employees and customers, to maximise productivity, and to innovate successfully. - Why focusing on profit as the ultimate goal of your business is actually NOT the best way of maximising profits. - Why a focus on behaviours is NOT enough to bring about a shift in attitudes within your business.

[Learning Theories](#) David C. Leonard 2002-12-30 Swift changes in educational technology are transforming the landscape of our society

and how we transfer knowledge in a digital world. Teachers, administrators, and education students need to stay abreast of these developments. Yet while the new educational software, technologies, and networks may be available, the learning theories and methods required to take complete advantage of the tools are often neglected. Learning theories are a crucial element of education studies for anyone involved with students from pre-school to higher education and business training. This book is a substantive dictionary of over 500 terms relating to learning theories and environments. Definitions range from approximately 100 to 700 words, and each term is identified by the primary type of learning theory to which it applies: cognitivism, constructivism, behaviorism, humanism, or organizational learning. An annotated bibliography provides further resources to the most important writings about learning theories.
