Multiple-Choice Questions in Control

Systems Engineering S. Palani 2026-01-01

This book covers multiple-choice questions (MCQs) related to the transfer function model applied to electrical, mechanical, and chemical engineering systems. It includes topics such as time response, specifications, frequency response using polar plot, Bode plot, and Nichol's plot. Additionally, it discusses specifications like phase margin, gain margin, resonant peak, and their corresponding frequencies. The book also contains MCQs related to stability studies using Routh-Hurwitz and Nyquist methods. It also includes MCQs about root locus, design of compensators and controllers, and state space modeling and analysis. The book comprises MCQs in the areas of root locus and the design of compensators and controllers. State space modeling and analysis have become increasingly important recently, leading to a rise in multiple-choice questions (MCQs) on this topic. This addition makes the book comprehensive for undergraduate and postgraduate students of electrical and electronics engineering.
