Introduction to Religious Studies Harvey J.

Sindima 2012-07-10 In Introduction to Religious

Studies, Harvey J. Sindima provides an

unconventional approach to the study of world

religions. Often, books and courses on religious

studies focus on the major world religions. This

approach, however, frequently ignores other

religious experiences, such as those of various

African groups as well as the indigenous people

of the Americas and Australia. These less

widespread religions are commonly described in

pejorative terms such as "primitive religions" or

"non-literate religions." Focusing solely on well-

known religions is an approach that

impoverishes religious studies and deprives

students of the enormous wealth of religious

knowledge of the world. Introduction to

Religious Studies pulls together the diverse

religious experience of Africans, Native

Americans, and the indigenous peoples of

Australia in order to provide a comprehensive

introduction to the study of religion and broaden

the horizons of religious studies students. Under

each theme or topic, examples are drawn from

religions of salvation as well as African and

Native American religious traditions. This book

provides students with a deep, wide, and very

rich introduction to religious studies.

The Quest 1927

An Anthropological Study of Spirits Christine

S. VanPool 2023-05-28 This book discusses the cultural importance of spirits, what spirits want, and how humans interact with them, using examples from around the world and through time. Examples range from the vengeful spirits of the Zulu that cast lightning bolts from clear skies to punish wrongdoers, to the benevolent Puebloan Kachina that encourage prosperity, safety, and rain in the arid American Southwest. The case studies illustrate how humans seek to cooperate (or counteract) spirits to heal the physical and spiritual ailments of their people, to divine the truth, or to gain resources. Building from their cross-cultural analyses, the authors further discuss how our physiology and psychology impact our interaction with the spirits. Readers will come away with an appreciation of the beauty and power of the

spirits that continue to shape the lives of people around the world.

Steering Human Evolution Yehezkel Dror 2020-05-07 Humanity must steer its evolution. As human knowledge moves a step ahead of Darwin's theories, this book presents the emergence of human-made meta-evolution shaping our alternative futures. This novel process poses fateful challenges to humanity, which require regulation of emerging science and technology which may endanger the future of our species. However, to do so successfully, a novel 'humanity-craft' has to be developed; main ideologies and institutions need redesign; national sovereignty has to be limited; a decisive global regime becomes essential; some revaluation of widely accepted norms becomes essential; and a novel type of political leader, based on merit in addition to public support, is

urgently needed. Taking into account the strength of nationalism and vested interests, it may well be that only catastrophes will teach humanity to metamorphose into a novel epoch without too high transition costs. But initial steps, such as United Nation reforms, are urgent in order to contain calamities and may soon become feasible. Being both interdisciplinary and based on personal experience of the author, this book adds up to a novel paradigm on steering human evolution. It will be of great interest to scholars and researchers of modern history, evolution sciences, future studies, political science, philosophy of action, and science and technology. It will also be of wide appeal to the general reader anxious about the future of life on Earth. Comments on the Corona pandemic add to the book's concrete significance.

Traditional Ritual as Christian Worship

Burrows, William R. 2018-03-27 A necessary task of missionaries in recent decades has been to help local Christians "inculturate" or "contextualize" their faith, although the criteria for doing so often came from outside the context in which new believers developed their understanding of Christianity. Highlighting the voices of non-Western scholars, this work recognizes the importance of ritual and ceremony in the life of communities that seek to worship God in ways that reflect culturally appropriate responses to Scripture. The contributors -- some of missiology's leading lights -- discuss rituals, beliefs, and practices of diverse peoples, supporting the conclusion that orthodox Christianity is hybrid Christianity.

Magic, Witchcraft, and Religion: A Reader in the Anthropology of Religion Pamela Moro
2009-09-18 This comparative reader takes an

anthropological approach to the study of religious beliefs and practices, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Divided into 10 chapters, this book begins with a broad view of anthropological ways of looking at religion and moves on to some of the core topics within the subject, such as myth, ritual, and the various types of religious specialties.

The Re-Enchantment of the West Christopher Partridge 2004 Challenging some assessments of religion in the West, this study argues that, although much organized religion, particularly Christianity, is in numerical decline, in actual fact we are witnessing an alternative spiritual re-enchantment of society and culture.
