Digital business transformation in operation(s) Frank Luyckx 2015-10-21 The success of companies depends on the speed of implementing their business model innovations. Innovating a business model is relatively easy - Osterwalder BMC can be applied. In order to continuously align the business model innovations with E2E processes, ICT template solutions and organizational performance metrics the Business Transformation (BT) lifecycle can help. This book shows use cases within companies like Philips, ERIKS, Unilever, Achmea and Friesland Campina. Furthermore, SAP explains how Business Process Management and Internet of Things can enhance business innovations. This book provides information on how to set up an BT roadmap using best practices, how to define the governance model and determine ROI. The BT lifecycle can help to improve the organizational agility, optimizing the project portfolio and reducing the complexity of the ERP template, thereby increasing the success rate of digital business transformation projects within the operational processes. Mapping the Journey Lorinda R. Rowledge 2017-11-28 This illuminating new book presents a series of in-depth case studies from around the world based on numerous personal interviews with organizational leaders and focusing on their journey towards sustainability. The aim is to provide visions of a more sustainable future, and shed light on the path, milestones and solutions - in particular the management processes these organizations employed - to provide a reliable compass that others can follow. Although each organization must take steps to fit its particular circumstance, business conditions and culture, Mapping the Journey proves that valuable lessons can be learned by setting aside critique as to where these organizations may yet make progress and instead focusing on the guidelines, targets, measures of success, tools and techniques and valuable wisdom about how pioneer organisations are travelling toward a prosperous, sustainable future. Each organization included has crafted its own unique strategic responses to an identified need for increased sustainability. While none can be said to have reached the end-point of a sustainable development strategy, all have found that, by addressing the challenge of sustainable industrial practices, they have found innovative solutions, new opportunities for revenue generation, better

relationships with customers, new business and product opportunities and a boost to morale from the executive ranks to front-line employees. Mapping the Journey examines both public and private organizations worldwide: SJ Rail of Sweden; Sony Corporation; SC Johnson; TransAlta Corporation; Patagonia; Henkel; Volvo; ASG; Interface Flooring Systems; Suncor; DaimlerChrysler; AssiDoman; Germany's Centre for Technology Assessment and the Dutch National Environmental Policy Plan. These case studies provide an inspiring framework of effective processes for defining a sustainable development strategy and transforming it successfully into actions and results.
