European context, which has received little attention in ELF research so far. The book examines the interplay between language, culture and identity in adolescents' ELF interactions. It combines quantitative and qualitative approaches to explore strategies secondary school students employ in a German-Tanzanian student exchange in order to reach their communicative goals. Introducing and drawing on the TeenELF corpus, the book investigates the speaker- and situation-specific potential of repetition and repair, complimenting, laughter and humour as well as various practices of translanguaging. The study reveals ELF as a transcultural space, in which different linguacultural influences meet and merge, while meaning, rapport and identity are interactionally negotiated. In the face of an increasing interest in ELF-informed pedagogy, the present approach investigates the communicative needs and competences of school students

and derives both theoretical as well as classroom implications from its linguistic findings.
