The Routledge Handbook on the Middle East Economy

Hassan Hakimian 2021-07-08

This Handbook captures the salient features of Middle Eastern economies and critically examines the public policy responses required to address the challenges and opportunities across the region. Bringing together wide-ranging perspectives from carefully selected and renowned subject specialists, the collection fills a gap in this relatively young and growing academic field. Combining discussion of theory and empirical evidence, the book maps out the evolution of Middle East economics as a field within area studies and applied development economics. Presented in six thematic sections, the book enables the reader to gain a comprehensive understanding of the region's main economic themes and issues: • Growth

and development in comparative perspectives • Labour force and human development • Natural resources, resource curse and trade • Poverty, inequality and social policy • Institutions and transition to democracy • Corruption, conflict and refugees Providing an overview of the principal economic problems, policies and performances relating to the countries in the Middle East and North Africa region, this collection will be a key resource for upper-level undergraduates, graduates and scholars with an interest in Middle East economics, applied development economics, development studies and area studies.

Prospects for Middle Eastern and North African Economies

Nemat Shafik 2016-07-27

Economic prospects for the

countries of the Middle East and North Africa are assessed in light of the changing world economy, increasing integration of trade and financial markets, greater needs for educated labour, and growing concerns about poverty and environmental degradation. Cross-country papers on thematic topics by international scholars are presented. The need for major economic reforms is emphasized if the region is to use greater integration in the world economy as the basis for generating growth and jobs and reducing poverty.

State-Owned Enterprises in the Middle East and North Africa Merih Celasun

2013-01-11 In the rapid world-wide spread of privatization, progress in the Middle East and North Africa region has

been markedly slow. This volume argues that a high level of overstaffing in public enterprises and the inability of economies to create jobs fast enough is mainly responsible for this. An in-depth study of the facts and a well-supported conclusion makes this an impressive collection of work on a very pertinent subject.
