

# Abaqus Documentation

Abaqus is a leading finite element analysis (FEA) solution used by engineers to simulate the real-world behavior of products, materials, and assemblies under complex conditions. This manual contains benchmark problems and analyses used to evaluate the performance of Abaqus; the tests are multiple element tests of simple geometries or simplified versions of real problems. The guide takes you through the process of understanding the Python programming language and the Abaqus Scripting Interface. Many examples are provided to help you develop your own scripts. Dassault Systèmes provides a knowledge base of questions and answers, solutions to questions that we have answered, and guidelines on how to use Abaqus, Engineering Process Composer,
