Teaching Girls Peter Kuriloff 2017-12-01 Women continue to be underrepresented in the high paying fields of science, math, and engineering. They receive only about 80% of the salary of men holding similar jobs in any field and still face glass ceilings that limit their attainment. How do we educate and empower girls to surmount these barriers and succeed throughout their lives? This unique book reveals the kinds of teaching that engages girls intellectually, fosters their creativity, and bolsters their confidence. Drawing on descriptions of great lessons written by nearly 2,000 students and teachers, it offers a practical, accessible guide to anyone who wants to find better ways to help young women succeed. The authors review the special qualities of lessons that resonate with girls and show how they meet their developmental needs throughout adolescence. They also show how vital it is that such teaching happen within schools that help students learn about the numerous ways that gender affects girls' development. The authors conclude by detailing how school leaders can create cultures that support this kind of great learning and teaching.

Personalized Learning in the Middle Grades Penny A. Bishop 2021-02-25 Personalized Learning in the Middle Grades shows how teachers in grades 5–8 can leverage the use of personalized learning plans (PLPs) to increase student agency and engagement, helping youth to establish learning goals aligned with their interests and assess their

own learning—particularly around essential skills that cut across disciplines. Drawing on their research and work with fifty schools in Vermont, where PLPs are used statewide, the authors show how personalized learning aligns with effective middle grades practice and provide in-depth examples of how educators have implemented PLPs in a wide range of schools representing different demographics and grade configurations. They also highlight five critical roles for teachers in personalized learning environments—as empowerer, scaffolder, scout, assessor, and community builder—and illustrate how teachers can adapt the PLP process for their own unique contexts. Grounded in experience and full of engaging examples, artifacts, and tools, the book builds on the emerging field of personalized learning and connects it with the developmental needs of middle schoolers to provide a unique and valuable resource for individual classroom teachers, teacher teams, school leaders, teacher-educators, and others.

Reframing the Subject Kelly Ritter 2016-01-23 "Mental hygiene" films developed for classroom use touted vigilance, correct behavior, morality, and model citizenship. They also became powerful tools for teaching literacy skills and literacy-based behaviors to young people following the Second World War. In this study, Kelly Ritter offers an extensive theoretical analysis of the alliance of the value systems inherent in mental hygiene films (class-based ideals, democracy, patriotism) with

writing education—an alliance that continues today by way of the mass digital technologies used in teaching online. She further details the larger material and cultural forces at work in the production of these films behind the scenes and their effects on education trends. Through her examination of literacy theory, instructional films, policy documents, and textbooks of the late 1940s to mid-1950s, Ritter demonstrates a reliance on pedagogies that emphasize institutional ideologies and correctness over epistemic complexity and de-emphasize the role of the student in his or her own learning process. To Ritter, these practices are sustained in today's pedagogies and media that create a false promise of social uplift through formalized education, instead often resulting in negative material consequences.
