Race, Ethnicity and Nuclear War Paul Williams 2011-01-01 Ranging across fiction and poetry, critical theory and film, comics and speeches, *Race, Ethnicity and Nuclear War* explores how writers, thinkers, and filmmakers have tackled the question: Are nuclear weapons white? Paul Williams addresses myriad representations of nuclear weapons: the Manhattan Project, the destruction of Hiroshima and Nagasaki, nuclear tests across the globe, and the anxiety surrounding the superpowers' devastating arsenals. Ultimately, Williams concludes that many texts act as a reminder that the power enjoyed by the white Western world imperils the whole planet.

The People We Meet in Stories Robert McParland 2020-10-20 Novels bring us into fictional worlds where we encounter the lives, struggles,

and dreams of characters who speak to the underlying pulse of society and social change. In this book, post-World War II America comes alive again as literary critic Robert McParland tilts the rearview mirror to see the characters that captured the imaginations of millions of readers in the most popular and influential novels of the 1950s. This literary era introduced us to Holden Caulfield, Augie March, *Lolita*, and other antiheroes. Together with popular culture heroes such as Perry Mason and James Bond, they entertained thousands of readers while revealing the underlying currents of ambition, desire, and concern that were central to the American Dream. Ralph Ellison's *Invisible Man* and James Baldwin's *Go Tell It on the Mountain* and Giovanni'sRoom explored racial issues and matters of identity that reverberate still today. The works of Jack Kerouac, the Beat poets Allen Ginsberg and Gregory Corso, and the clever and creative William S. Burroughs and his *Naked Lunch* challenged conventional perspectives. *The People We Meet in Stories* will appeal to readers discovering these works for the first time and to those whose tattered paperbacks reveal a long relationship with these key works in American literary history.

Dystopian States of America Matthew B. Hill 2022-09-13 *Dystopian States of America* is a crucial resource that studies the impact of dystopian works on American society-including ways in which they

reflect our deep and persistent fears about environmental calamities, authoritarian governments, invasive technologies, and human weakness. *Dystopian States of America* provides students and researchers with an illuminating resource for understanding the impact and relevance of dystopian and apocalyptic works in contemporary American culture. Through its wide survey of dystopian works in numerous forms and genres, the book encourages readers to connect with these works of fiction and understand how the catastrophically grim or disquieting worlds they portray offer insights into our own current situation. In addition to providing more than 150 encyclopedia articles on a large and representative sample of dystopian/apocalyptic narratives in fiction, film, television, and video games (including popular works that often escape critical inquiry), *Dystopian States of America* features a suite of critical essays on five themes—war, pandemics, totalitarianism, environmental calamity, and technological overreach—that serve as the foundation for most dystopian worlds of the imagination. These offerings complement one another, enabling readers to explore dystopian conceptions of America and the world from multiple perspectives and vantage points.

The Nightmare Considered Nancy Anisfield 1991 These essays assess the nature of nuclear war literature from a variety of perspectives. Scholars, activists, novelists, poets, and teachers challenge nuclear ideologies and traditional readings of apocalyptic texts. Included: Holocaust literature of the 1950s, Michael Dorris and Louise Erdrich, poetry and nuclear war, Riddley Walker, Fiskadoro, haiku and Hiroshima, Kopit's *End of the World*, O'Brien's *The Nuclear Age*, and Vonnegut's cataclysmic novels.

Alas, Babylon Pat Frank 2025-03-18 "An extraordinary real picture of human beings numbed by catastrophe but still driven by the

unconquerable determination of living creatures to keep on being alive." --The New Yorker The classic apocalyptic novel by Pat Frank, first published in 1959 at the height of the Cold War, with an introduction by award-winning science fiction writer and scientist David Brin. "Alas, Babylon . . ." With those fateful words, the world as we knew it ended. When the unthinkable nightmare of nuclear holocaust ravaged the United States, it was instant death for tens of millions of people; for survivors, it was a nightmare of hunger, sickness, and brutality. In an instant, a thousand years of civilization were stripped away. But for one small Florida town, spared against all odds, the struggle was just beginning, as men and women of all ages and races found the courage to join together and push against the darkness. Pat Frank's classic disaster novel, first published in 1959 at the height of the Cold War, remains prescient in its vision and immediate in its horror.

Dangerous Visions and New Worlds Andrew Nette 2021-10-26 Much has been written about the "long Sixties," the era of the late 1950s through the early 1970s. It was a period of major social change, most graphically illustrated by the emergence of liberatory and resistance movements focused on inequalities of class, race, gender, sexuality, and beyond, whose challenge represented a major shock to the political and social status quo. With its focus on speculation, alternate worlds and the future, science fiction became an ideal vessel for this upsurge of radical protest. Dangerous Visions and New Worlds: Radical Science Fiction, 1950 to 1985 details, celebrates, and evaluates how science fiction novels and authors depicted, interacted with, and were inspired by these cultural and political movements in America and Great Britain. It starts with progressive authors who rose to prominence in the conservative 1950s, challenging the so-called Golden Age of science fiction and its linear narratives of technological breakthroughs and space-conquering male heroes. The book then moves through the 1960s, when writers, including those in what has been termed the New Wave, shattered existing writing conventions and incorporated contemporary themes such as modern mass media culture, corporate control, growing state surveillance, the

Vietnam War, and rising currents of counterculture, ecological awareness, feminism, sexual liberation, and Black Power. The 1970s, when the genre reflected the end of various dreams of the long Sixties and the faltering of the postwar boom, is also explored along with the first half of the 1980s, which gave rise to new subgenres, such as cyberpunk. Dangerous Visions and New Worlds contains over twenty chapters written by contemporary authors and critics, and hundreds of full-color cover images, including thirteen thematically organised cover selections. New perspectives on key novels and authors, such as Octavia Butler, Ursula K. Le Guin, Philip K. Dick, John Wyndham, Samuel Delany, J.G. Ballard, John Brunner, Judith Merril, Barry Malzberg, Joanna Russ, and many others are presented alongside excavations of topics, works, and writers who have been largely forgotten or undeservedly ignored.
