Images and Ideas in Modern French Piano Music Siglind Bruhn 1997 In our visually-oriented society, music appears to stand apart from other arts. Yet just as a poet can write a poem whose focus is a painting, so musicians have composed scores based on poems, paintings, and other non-musical art forms. In instrumental music such reinterpretations are especially intriguing as the verbal or visual stimulus does not appear in performance but is rendered in musical form. In this study, Siglind Bruhn investigates how three French composers of the twentieth century, Claude Debussy, Maurice Ravel, and Olivier Messiaen, express extra-musical subtexts in their piano works. She shows how the relation between the subtexts and the musical works can be broadly categorized in terms of pictoriality and interiority. In all cases, Bruhn analyzes each musical piece and each source text in its entirety and in depth, drawing on her broad background in both literary and musical interpretation of the twentieth century. For pianists who seek to better understand an individual work, for scholars in the growing field of musical hermeneutics, and for lovers of music in general, this volume explores and makes explicit connections between music and other arts.

Messiaen's Musical Techniques: The Composer's View and Beyond Gareth Healey 2016-04-22

Despite Messiaen's position as one of the greatest technical innovators of the twentieth century, his musical language has not been comprehensively defined and investigated. The composer's 1944 theoretical study, *The Technique of My Musical Language*, expounds only its initial stages, and while his posthumously published *Traité de rythme, de couleur, et d'ornithologie* contains detailed explanations of selected techniques, in most cases the reader is left to define these more precisely by observing them in the context of Messiaen's analyses of his own works. Technical processes are nevertheless in many cases the primary components of a work or movement. For instance, personages dominate 'Joie du sang des étoiles' from the *Turangalîla-symphonie*, and in certain cases, such as 'L'échange' from the *Vingt regards sur l'Enfant-Jésus*, the process (asymmetric augmentation) is the only structuring element present. Given this reliance on idiosyncratic techniques, clear comprehension of the music is impossible without a detailed knowledge of Messiaen's methods. Gareth Healey charts their development and interconnections, considers their relationship with formal structures, and applies them in refined and extended form to works for which Messiaen himself left no published analysis.
