Is Socialism Feasible? Geoffrey Martin Hodgson 2019 After being proclaimed dead, there is now a major revival of socialist ideology in the West. But what does socialism mean? This book shows that it is irretrievably associated with common ownership. The twentieth-century experience of comprehensive national planning with state ownership has been disastrous, and in no case has democracy endured within large-scale socialism. This volume explains why. The alternative socialist option of worker-owned cooperatives must accept a major role for markets that many socialists reject. Featuring theoretical arguments and practical investigations, Geoffrey M. Hodgson interrogates the failures of socialist states, scrutinizing the impact and outcomes of a centralized politico-economic system. This timely and convincing book offers insight into the twentieth-century experience of comprehensive national planning, deploying less-well-known criticisms from Albert Schaffle and Michael Polanyi. Hodgson's nuanced approach brings together small-scale socialist praxis and principles of liberal solidarity, exploring an experimental approach to political and economic reform. Provocative, insightful and accessible, this book is of considerable interest to any reader with an appetite for the history of socialist theory, as well as those keen to explore new insights to heterodox economics. Students and academics of the social sciences and humanities will benefit from this book's rigorous empirical approach to historic and contemporary socialist states and its in-depth discussion of Austrian school theory.

No Way Out: Brexit: From the Backstop to Boris Tim Shipman 2024-04-25 THE INSTANT SUNDAY TIMES BESTSELLER 'Meticulously sourced, merciless and revelatory. It is a closely observed study of power, and how it is gained, used and lost' FINANCIAL TIMES The

unmissable next instalment of Tim Shipman's #1 bestselling Brexit quartet.

Assessing Regional Integration in Africa VIII United Nations Publications 2017 The establishment of the Continental Free Trade Area (CFTA) is a major milestone in the long march of African integration. As foreseen in the Treaty Establishing the African Economic Community (commonly known as the Abuja Treaty), which entered into force in 1994, the integration process is to culminate in the African Economic Community. A review of the current status of Africa's economic integration is the subject of Chapter 2. The CFTA aspires to liberalize trade between African countries across the continent and to build on the considerable successes already achieved within Africa's regional economic communities (RECs). By doing so, the CFTA is set to facilitate intra-African trade; foster regional value chains that can facilitate integration into the global economy; and energize industrialization, competitiveness and innovation-- and thereby contribute to African economic and social progress and development.

European Union in the Global Context Simon Sweeney 2023-12-22 *European Union in the Global Context* explores the interplay between the state and state sovereignty, nationalism, European integration and globalisation. It provides essential foundations in these areas, while using stimulating arguments to prompt discussion and provoke interest in the relationships between these processes. It critically analyses the challenges faced by the EU from the contemporary political and economic dynamics of globalisation (IPE), including trading relationships set through the WTO and bilateral relations with emerging markets, especially the BRICS economies. Likewise, pressures from within, such as a resurgence of nationalism, localisation, anti-austerity politics, and Euroscepticism, are examined. While the Union is fundamentally challenged by pressures from above and below, and by its own internal

dysfunction, it remains central to the effective management of the international political economy. *European Union in the Global Context* is a lively, focused and engaging text, incorporating anecdotes and contemporary arguments, and presenting different perspectives on European integration and globalisation. It will be of key interest to students of European Politics, European Studies, European Union Studies, and more broadly, global political economy, foreign and security policy and international relations.

Patriotism to the Earth Richard A. Falk 2025-04-23 In another soon-to-be-classic, Richard Falk provides a hopeful call to action to avert sleepwalking toward a collective species death wish, and to reimagine allegiance to the nation state instead as a humane patriotism for sustainability and ecological viability.

Global Learning and International Development in the Age of Neoliberalism Stephen McCloskey 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side-stepping the dominant development question of our age, the neoliberal growth paradigm. It argues that this crisis can be addressed, at least in part, by the sector's re-engagement with the radical development education process that it helped to foster and sustain for over two decades. The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical, brand conscious and disconnected from its base. This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South. This book recommends re-embracing the radical origins of global learning, situated in the participative methodology and praxis (reflection and action) of Paulo Freire, both as internal capacity-building and external public engagement. The book proposes a new development paradigm, focusing on bottomup, participative approaches to policy-making based on the needs of those NGOs claim to represent - the poor, marginalised and voiceless - rather than constantly following the agenda of donors and governments. The recommendations made by

this book will serve as an important resource for researchers and students of international development and global learning, as well as to NGOs, civil society activists and education practitioners looking for solutions to the problems within the sector.

Global Marketing Management Masaaki (Mike) Kotabe 2022-09-27 An indispensable resource for students of marketing, management, and international business In the newly revised ninth edition of *Global Marketing Management*, a decorated team of international marketing professionals delivers an authoritative discussion of the realities of global marketing in today's economy and an insightful exploration of the future of marketing to an international audience. You'll obtain an integrated understanding of marketing best practices on a global scale, complete with relevant historical background and descriptions of current marketing environments. The latest edition builds on four major structural changes to the global marketing environment: growing anti-globalization sentiment, the growth of information technology tools, the increasing demand for personalization, and the environmental impact of business activity. In-depth case studies offer lively discussions of real-world global marketing campaigns and are accessible online. *Global Marketing Management* also provides: Thoroughly updated examples and case studies with contemporary information An ongoing emphasis on the increased volatility and uncertainty of today's global markets Updated discussions of the balance to be struck between pursuing economies of scale and respecting unique cultural sensitivities New explorations of major global environmental and ethical issues New chapters on emerging markets, internet marketing, and corporate social responsibility

Global Business Mahesh Joshi 2018-08-02 In the wake of the Brexit vote and the election of Donald Trump, globalization has found itself increasingly under the microscope. An active international discussion is underway, and the ideological viewpoint that the reversal of globalization and a return to protectionism and isolation will cure the world's ills is touted by many. In the midst of the growing prominence of international interconnectivity and contradicting attention attained by skewed

misinformation about global impact, Global Business is a straightforward commentary on mega trends in globalization. With insights and observations from academics, practitioners, and practical thinkers from around the world Global Business demystifies the economic, social, and cultural impacts of globalism and globalization, and presents a balanced explanation of what is happening and how it affects everyone. It highlights that technology and change are not new, and explores the path taken to reach our current interconnected global state. It encourages a realistic examination of where we are and invites a dialogue on where we can go together.

What cultural challenges relating to leadership do organisations face when doing business in foreign countries? Jann Guzikewitz 2017-08-31 Master's Thesis from the year 2017 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, Buckinghamshire New University, language: English, abstract: The aim of this study is to identify and evaluate the cultural challenges within organisational leadership imposed by their internationalisation activities. This dissertation aims to create an understanding for the relevance of cultural differences within the internationalisation process. It does so by analysing the cultural differences between the German and Swedish construction supply industries. The research question is; what are the cultural challenges related to leadership that organisations face when doing business in foreign countries. I discuss this question based on the analysis of the contemporary academic literature, whereby Hofstede's cultural model is considered. Semi-structured expert interviews were used to analyse the current cultural situation in both industries as well as to evaluate the findings of the theory. In conclusion, the analysis of the German and Swedish construction supply industries showed a significant difference between the contemporary literature and the primary findings of this thesis. Certain aspects of the cultural dimensions of both industries did not correspond to the literature's view of each country's culture. Although both industries are similar they show differences, which are recognised within the approach to leadership. Cultural

changes are recognised in both countries and industries, as transformation in structure, resources, and expertise are being accelerated by the internet, disruptive technologies, tourism, media and migration. As technology and human migration progress, further cultural research is necessary.

The Impact of Higher Education Ranking Systems on Universities Kevin Downing 2021-04-05 This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the 'Big Three' global ranking systems and, using interviews with senior administrators, academics and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question, therefore, seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions - South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator or governing body interested in or affected by global higher education ranking systems.

Research Handbook on Methods and Models of Competition Law Deborah Healey 2020-11-27 This comprehensive Handbook illuminates the objectives and economics behind competition law. It takes a global comparative approach to explore competition law and policy in a range of jurisdictions with differing political economies, legal systems and stages of development. A set of expert international contributors examine the operation and enforcement of competition law around the world in order

to globalize discussions surrounding the foundational issues of this topic. In doing so, they not only reveal the range of approaches to competition law, but also identify certain basic economic concepts and types of anticompetitive conduct that are at the core of competition law.

Rethinking International Strategy in Times of rising Uncertainty. The Internationalization of Tesla Inc. Moritz Henninger 2021-02-17 Bachelor Thesis from the year 2020 in the subject Business economics - Business Management, Corporate Governance, grade: 1.3, University of Stuttgart (Institute for International and Strategic Management), language: English, abstract: This paper hopes to answer how increasing uncertainty is impacting International Management and how new and innovative companies like Tesla Inc conduct international expansion. Economic activities in the 21st century, are characterized by dynamic global competition, the increasing interdependence and internationalization of economic relations and the resulting merging of world markets. With the continuous expansion of world trade and investment, with factors of production being highly mobile, and with the sources of innovation becoming increasingly global, an increasingly larger share of the global economy is reasonably accurately characterized as "open" it est as being exposed to the forces of global competition, and to the international flows of capital, technology and skilled labor. Yet, the belief in globalization and free trade seems to be in disarray since the shocks of Brexit and Trump in 2016. In various regions of the world, a flare-up of nationalism, protectionism and trade barriers is creating a politically and economically volatile atmosphere. While 2019 and 2020 brought new obstacles - from customs tariffs to a global pandemic - this has led to a shift in framework conditions rather than an end to international competition. In addition, a lot of companies across various business sectors are entangled in extensive and expensive investment or restructuring programs brought upon by the ever-increasing pace of technological, sociological and legal developments. Still, there is uncertainty if these investments will one day pay off or turn out the be a charge in the wrong direction. Between 1970 and 2018, FDI grew from 14.2 billion to 1.43 trillion US dollars, an increase of over 900

percent. Based on this rapid development, participation in international competition has become a matter of course - if not a necessity - for many companies, and their attention is focused on efficient conduct and value-adding administering of international activities. This begs the question how internationally active companies with a global and decentralized value chain can fight rising uncertainty and react to constantly changing environments? How can these companies not only hold on to existing business but expand their dominance in the market against the backdrop of uncertainty? Are established strategy models such as Ghemawat's AAA model still applicable today, do they need to be revised or is there even a need for completely new approaches?

Reglobalization Matthew Louis Bishop 2021-03-12 This book charts the way towards a better, repurposed globalization, which it calls 'reglobalization', and shows how this can be built, incrementally but realistically, via reforms to the partial and fragile existing structures of global governance. In making this argument, the book firmly rejects the new fashion for a politics of deglobalization, which has appeared of late in both left-wing and right-wing variants. Instead, it suggests that a reformed Group of 20 (G20), for all its current inadequacies, can still provide the critical coordinating function that the management of a process of reglobalization requires. The book argues that globalization is too important to be lost; rather, it needs to be saved from its capture by neoliberalism and rebuilt around different values for a post-neoliberal era. The emergence of global pandemic as an issue only goes to emphasise the necessity, importance and urgency of the reglobalization project. Reglobalization is essential reading for everybody living in the era of globalization, which is all of us, and worried about its many economic, social and political problems, which is a growing number of us. The chapters in this book were originally published in the journal Globalizations.

World Economy in 2017 IntroBooks 2018-02-22 The election of Donald Trump as the President of the United States took the world by surprise. The Presidential win of Donald Trump will remain as one of the most dominant features of the economy of the world that happened in 2016 and will continue to embark itself in the global market for next series of years. Until now, the stocks of the United States are soaring and setting records. The other global markets and economies are taking their lows in the economy to the rallies as the global investors have been selling bonds and buying stocks in their belief that the pro-business administration of Donald Trump will help them in tax cuts, stimulate the fiscal policy and the deregulation to inflame the inflation and economic growth in the largest economy of the World. Such headwinds are expected to continue in 2017 at least not the ones which are highly elevated by means of political expectations which imply that this is the biggest risk in the world about facing stocks. However, this would also yield higher returns that will inhibit multiple expansion of the economy and the strengthening of the USD which would lay the importance on corporate earnings or guidance. With the Presidential election of Donald Trump, the world can expect more stock availability in the global market on an assumption that the President continues to use his Twitter account!
