I have a DTO class which I Serialize  
Json.Serialize(MyClass) How can I exclude a public property of it? (It has to be public, as I use it in my code somewhere else) I've opened VS Code's settings.json file many times, and each time I forgot where it was. If I go to File → Preferences → Settings, I get the graphical settings interface (screenshot). I want to open I am using jquery, JSON, and AJAX for a comment system. I am curious, is there a size limit on what you can send through/store with JSON? Like if a user types a large amount and I send it through ... JSON (JavaScript Object Notation) is a lightweight format that is used for data interchanging. It is based on a subset of JavaScript language (the way objects are built in JavaScript). As stated in the MDN, ... I stringify

it to convert to JSON. How do I save this JSON to a local text file so I can open it, say, in Notepad etc. May 11, 2013 · Here I'm creating a JavaScript object and converting it to a JSON string, but JSON.stringify returns "[object Object]" in this case, instead of displaying the contents of the object. My Python program receives JSON data, and I need to get bits of information out of it. How can I parse the data and use the result? I think I need to use json.loads for this task, but I can't under... JSON is a format that encodes objects in a string. Serialization means to convert an object into that string, and deserialization is its inverse operation (convert string -> object). When transmitting data or ... Here the message contains single quotation mark, which is same as the quotation used in JSON. What I do is fill up a

string from user inputs such as message. So, I need to escape those kind of special ... Are you sure you want to create JSON and not rather a JS object? Also, what parts of the object are supposed to be variables? How is the first part connected to the second part? If you really want to ...
