Defensive Tactics Stanley Loel Kephart 1979 This manual is a pictorial review of arrest control techniques, not a complete course by itself. It is intended to be used by the student with "The Programmed Learning System for Defensive Tactics." This manual is divided into sections dealing with balance and recovery, searching and handcuffing, minimal restraint holds, and baton use. Contained in each section are procedures which illustrate specific techniques. It is recommended that the participant study and practice each procedure until the techniques are mastered. Since each procedure is built on the foundation preceding it, it is essential to follow the order of presentation in this manual. This manual is intended for use by all State Park Peace Officers. All techniques are demonstrated in this manual by State Park Rangers. The term "ranger" has been used throughout for ease of narration. All illustrations are depicted by right-handed rangers.

**Michigan Patrol Officer Defensive Tactics Curriculum** Wollack & Associates 1981 This report summarizes the meetings and workshops at which an examination was evolved to test proficiency of trainees in police defensive tactics. The examination accompanies a standardized training manual in these techniques, which are to be used statewide. The initial brainstorming session discussed the types of events to be included in a statewide defensive tactics examination, the criteria for evaluating performance, the use of assessment teams, the degree of resistance to be employed in the test, and the possible use of a wrestling scenario as a criterion measure. Subsequent meetings reviewed the tactics and techniques previously agreed upon and settled details of test administration. The latter included questions of how many techniques a student should exhibit mastery in, retesting procedures, and selection of the assessment team. One workshop had a 'hands-on' portion where defense instructors performed the techniques called for in the draft examination. Two pilot tests of the draft examination were conducted at two State police academies with trainees who had received defensive tactics instruction. These sought to determine the degree of concordance among raters and the adequacy of the administrative process in the testing model, as well as student opinions of the procedure. The completed set of materials consists of a student manual with sequential photographs and narrative descriptions, a narrated videotape that depicts the techniques, and a manual that describes the procedures for administering the examination. The latter is appended to this report and discusses the project history, facilities for defensive tactics instruction, methods of instruction, and procedures for final testing. In its appendix are a pairing model of defensive tactics final examination, a model for testing flow, and the final practical examination format and assessor scoring sheet. Lists of planning workshop participants are included. Charts are also given.

Advanced Concepts in Defensive Tactics Chuck Joyner 2010-12-16 Today's society is becoming increasingly more likely to resist the lawful actions of law enforcement officers. It is critical for officers to have the necessary defensive tactics (DT) skills to successfully overcome resistance in an efficient, safe, and legal manner. The answer to achieving these results is NOT in teaching thousands of possible responses to an infinite number of potential attacks. The answer is to first use a Risk Management approach and identify the most common and dangerous attacks on officers. Next, a successful DT program must stress core concepts, proper body mechanics, natural instinctive movement, and proven principles of survival. Advanced Concepts in Defensive Tactics: A Survival Guide for Law Enforcement presents the instruction of Master Police Instructor Chuck Joyner. Developed during his tenure as a FBI use of force instructor, and expanded by his lifelong dedication to the martial arts, Joyner's Survival Sciences DT program relies on adhering to advanced concepts rather than memorizing countless techniques. Based on extensive research and actual street experience, this manual: Focuses on defensive tactics that are easily taught, understood, and applied by officers regardless of their size, strength, or athletic ability Covers hand-to-hand tactics, groundwork, weapon retention/weapon disarming, handcuffing, and the survival mindset Explains the necessary integration of hands-on DT techniques with common law enforcement secondary weapons (e.g., baton, pepper spray, TASER) Introduces a new use of force model (Dynamic Resistance-Response Model) which correctly depicts the dynamic encounter between an officer and a resistor by first focusing on the level of resistance by the subject Offers practical solutions reducing officer, department, and municipality liability Provides password access to the author's supplemental training videos online Chuck Joyner, a recognized expert in the use of force, lectures throughout the United States and internationally on myriad law enforcement topics. Mr. Joyner holds several FBI instructor certifications in force-related training, has earned black belts in four martial arts, and was awarded master rank in two styles. He was inducted into the Martial Arts Hall of Fame as instructor of the year in 2006. Mr. Joyner was employed by the CIA from 1983 to 1987, and has worked as a Special Agent with the FBI since 1987. Chuck was interviewed on February 29, 2012 on American Heroes Radio.
