## **US Icons and Iconicity**

Walter Hölbling 2006 This book investigates the ontology as well as the social and cultural impact of US icons. American Studies scholars from various nations have come together to explore origins, maintenance, and manipulation of icons and to trace their hegemonic as well as subversive impact. Icons experience mutation, modulation, adjustment, and diversification until they either fade or join the pantheon of core US icons, becoming almost eternal. Contributions include analyses of iconic figures such as Billy the Kid, Fred Astaire and Ginger Rogers; stereotypes from obese bodies via Aunt Jemima to iconic femmes; and material icons such as the Dollar Bill, the Zapruder footage of the JFK assassination or iconic

sites like the Vietnam Veterans Memorial.

What is American? Walter

Hölbling 2004 "Identity is one of the central cultural narratives of the US on which both dominant and resistant discourses draw. This critical anthology honors the topic's diversity while concentrating on one central aspect, that of newness. Construction of identities, their invention, reinvention and reformulation are discussed within four thematic categories: New Concepts and Reconsiderations, Migration and Multiple Identities, Individuation and Privatized Identity Construction, and (Re-) Inventions and Virtual Identities. Written by European as well as U. S. scholars, ranging from the 19th century to the utopian future, from mainstream canonized figures to transgender performers, from a critique of individualism to a celebration of loneliness, the articles present a cross-section of current research on U.S. identities. novelist, filmmaker, and short story writer Sherman Alexie, Daniel Grassian offers a comprehensive look at a writer immersed in traditional Native American, as well as mainstream American, culture. *The New American West in Literature and the Arts* Amaia Ibararan-Bigalondo

2020-05-12 The story of the American West is that of a journey. It is the story of a movement, of a geographical and human transition, of the delineation of a route that would soon become a rooted myth. The story of the American West has similarly journeyed across boundaries, in a two-way movement,

sometimes feeding the idea of that myth, sometimes challenging it. This collection of essays relates to the notion of the traveling essence of the myth of the American West from different geographical and disciplinary standpoints. The volume originates in Europe, in Spain, where the myth traveled, was received, assimilated, and re-presented. It intends to travel back to the West, in a two-way cross-cultural journey, which will hopefully contribute to the delineation of the New—always self-renewing—American West. It includes the work of authors of both sides of the Atlantic ocean who propose a cross-cultural, transdisciplinary dialogue upon the idea, the geography and the representation of the American West.
