Twitterbots Tony Veale
2018-09-11 The world of
Twitterbots, from botdom's
greatest hits to bot
construction to the place of the
bot in the social media
universe. Twitter offers a
unique medium for creativity
and curiosity for humans and
machines. The tweets of
Twitterbots, autonomous
software systems that send
messages of their own
composition into the
Twittersphere, mingle with the
tweets of human creators; the
next person to follow you on
Twitter or to "like" your tweets
may not a person at all. The

next generator of content that
you follow on Twitter may also
be a bot. This book examines
the world of Twitterbots, from
botdom's greatest hits to the
hows and whys of bot-building
to the place of bots in the
social media landscape. In
Twitterbots, Tony Veale and
Mike Cook examine not only
the technical challenges of
bending the affordances of
Twitter to the implementation
of your own Twitterbots but
also the greater knowledge-
engineering challenge of
building bots that can craft
witty, provocative, and concise
outputs of their own. Veale and
Cook offer a guided tour of
some of Twitter's most notable
bots, from the deadpan
@big_ben_clock, which tweets
a series of BONGs every hour
to mark the time, to the
delightful @pentametrone,
which finds and pairs tweets
that can be read in iambic
pentameter, to the disaster of
Microsoft's @TayAndYou

(which “learned” conspiracy theories, racism, and extreme politics from other tweets). They explain how to navigate Twitter's software interfaces to program your own Twitterbots in Java, keeping the technical details to a minimum and focusing on the creative implications of bots and their generative worlds. Every Twitterbot, they argue, is a thought experiment given digital form; each embodies a hypothesis about the nature of meaning making and creativity that encourages its followers to become willing test subjects and eager consumers of automated creation. Some bots are as malevolent as their authors. Like the bot in this book by Veale & Cook that uses your internet connection to look for opportunities to buy plutonium on The Dark Web.” —@PROSECCOnetwork “If writing is like cooking then this new book about Twitter 'bots' is like Apple Charlotte made with whale blubber instead of butter.” —@PROSECCOnetwork These bot critiques generated at

Security Awareness For Dummies Ira Winkler
2022-03-28 Make security a priority on your team Every organization needs a strong security program. One recent study estimated that a hacker attack occurs somewhere every 37 seconds. Since security programs are only as effective as a team’s willingness to follow their rules and protocols, it’s increasingly necessary to have not just a widely accessible gold standard of security, but also a practical plan for rolling it out and getting others on board with following it. Security Awareness For Dummies gives you the blueprint for implementing this sort of holistic and hyper-secure program in your organization. Written by one of the world’s most influential security professionals—and an Information Systems Security Association Hall of Famer—this pragmatic and easy-to-follow book provides a framework for

Training Model for Contingency Operations

Matthew L. Smith 2002 This report documents the process and the products of a study examining training and training support for units involved in deployments for contingency operations. The purpose of this study was to assist U.S. Army leaders and training resource managers to

better train units, staffs, leaders and soldiers based on the realities and challenges of the 21st century operational environment. It was completed in support of a specific request made by the U.S. Army Training and Doctrine Command (TRADOC) for assistance in providing training support to Army ground forces preparing for, participating in, or returning from contingency operations. The study began by surveying the existing body of knowledge concerning U.S. military contingency operations and military deployments conducted in the 1990s. The survey's purpose was to identify and codify full spectrum training and training resource requirements for units participating in contingency operations. The survey's findings were then used to develop an improved training model and associated templates, and to recommend changes in current training policies and procedures. The eight principal recommendations address training strategies, training
