## **Encyclopedia of the Sciences of Learning**

Norbert M. Seel 2011-10-05 Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstreams of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories, such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines, such as philosophy and epistemology, education, information science, biology, and - as a result of the emergence of computer technologies - especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other; as a consequence, even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of

instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the Encyclopedia provides fast access to the most relevant theoretical terms provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies; supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications. The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.

*German Popular Cinema and the Rialto Krimi Phenomenon* Nicholas G. Schlegel 2022-01-28  
German Popular Cinema and the Rialto Krimi Phenomenon: Dark Eyes of London examines the Kriminalfilme—or Krimis—based on the novels of English author Edgar Wallace, released by Rialto Film between 1959 and 1972 as part of the post-World War II era of German popular cinema that enjoyed extraordinary popularity with the German public. Nicholas G. Schlegel analyzes how this group of West German thrillers not only nurtured a convalescing film industry, but also provided unequalled national entertainment while canonizing Rialto's Krimi productions in terms of their historical genesis, aesthetic characteristics, and social reception. Schlegel surveys the Krimi's enduring legacy, calculable global influence, inevitable decline, and eventual migration to television in the 1970s, where it thrived but ultimately took on a more somber tone. Scholars of film, television, history, and German culture will find this book particularly useful.

*Lost Faith and Wandering Souls* David R. Morris

2022-03-01 In *Lost Faith and Wandering Souls*,

religion scholar David Morris offers a

psychologically informed investigation of the

widespread religious disillusionment shaping

contemporary spiritual life. Drawing from

psychoanalytic theory, developmental

psychology, and sociological research, Morris

argues that faith loss should be understood not

as mere rebellion or deconversion, but as a

profound experience of mourning and moving

forward. The book's first section engages

foundational thinkers—Freud, Erikson, Klein,

Winnicott—and reframes religious disaffection

through concepts such as transitional space,

object loss, and the depressive position. The

second section applies this theoretical

framework to contemporary spiritual memoirs.

Through authors such as Kate Young Caley,

Diana Butler Bass, and Randall Balmer, Morris

identifies a recurring pattern: withdrawal,

disorientation, creative reconstruction, and

eventual reengagement with new forms of

spiritual meaning. By examining the psychic and

social dynamics of faith disruption, Morris

demonstrates that healing requires more than

intellectual reassessment—it calls for emotional

integration and the cultivation of imaginative

play. With clarity and compassion, *Lost Faith*

and *Wandering Souls* helps readers name their

disillusionment and grieve their losses with

agency, creativity, and a sense of belonging. This

is essential reading for scholars, clergy,

therapists, and spiritual seekers navigating the complex terrain of post-religious life.

**Phenomena** Susan Tarr 2016-06-30 As a child I

knew Malcolm, who was then a young man. Dad

often invited him home for meals. Malcolm was

one of the 'lost children' forgotten or abandoned

by their families. We followed his story from

childhood to adulthood as best we could even

after he was eventually discharged back into the

community. When considering the tragedy and

abuse of Malcolm's wasted earlier years, it is a

story of immeasurable sadness. Yet he ultimately

rose above it all, and with admirable strength,

courage and innate resilience, was finally able to

free 'the regular boy within' as he had always

wanted. I was raised within the community of

the Seacliff Mental Hospital village so it was

difficult to know where fiction ended and the

greater truth took over. To separate the truths

from the almost-truths at this stage would be an

impossible task as many of those concerned have

died. Therefore I have blended together various

stories as representative of our family and

friends' combined belief of what most probably

did happen during the period covered. Wherever

possible, I've used correct dates, names and

places. When there is doubt I've changed names

and details for the protection of those still living.

This is Malcolm's story as I believe it unfolded.
