Gilles Deleuze: Affirmation in Philosophy Jay Conway 2010-10-27 Why does knowledge of philosophy presuppose knowledge of reality? What are the characters in Deleuze's theatre and philosophy? How are his famous metaphysical distinctions secondary to the concept of philosophy as practice and politics? These questions are answered through careful analysis and application of Deleuzian principles.

The X-Files and Philosophy Robert Arp

2017-04-07 In *The X-Files and Philosophy*, thirty-six fearless philosophers seek for the truth which is out there, in here, at least somewhere, or (as the postmodernists claim) nowhere. One big issue is whether the weird and unexplained happenings, including the existence of entities unknown to traditional science, might really exist. And if they did, what would be the proper way to behave towards them? Some of these entities seem to flout conventional laws of nature—but perhaps we need to allow for different, as yet undiscovered, laws. If such fabulous entities really exist, what do we owe them? And if they don't exist, why do we imagine they do? In *The X-Files*, regular science is

represented by Scully and usually turns out to be wrong, while open-minded credulity or pseudoscience is represented by Mulder and usually turns out to be right, or at least somehow on the right track. Scully demands objective, repeatable evidence, and she usually gets it, with Mulder's help, in astounding and unwelcome ways. What lessons should we take from the finding of *The X-Files* that respectable science is nearly always wrong and outrageous speculative imagination nearly always right?

Mapping Ideology Slavoj Žižek 1994 For a long time, the term "ideology" was in disrepute, having become associated with such unfashionable notions as fundamental truth and the eternal verities. The tide has turned, and

recent years have seen a revival of interest in the questions that ideology poses to social and cultural theory and to political practice. Including Slavoj Žižek's study of the development of the concept from Marx to the present, assessments of the contributions of Lukács and the Frankfurt School by Terry Eagleton, Peter Dews and Seyla Benhabib, and essays by Adorno, Lacan and Althusser, *Mapping Ideology* is an invaluable guide to the most dynamic field in cultural theory.

Intensities and Lines of Flight Antonio Calcagno

2014-05-08 The writings of Gilles Deleuze and Felix Guattari offer the most enduring and controversial contributions to the theory and practice of art in post-war Continental thought. However, these writings are both so wide-ranging and so challenging that much of the synoptic work on Deleuzo-Guattarian aesthetics has taken the form of sympathetic exegesis, rather than critical appraisal. This rich and original collection of essays, authored by both major Deleuzian scholars and practicing artists and curators, offers an important critique of Deleuze and Guattari's legacy in relation to a multitude of art forms, including painting, cinema, television, music, architecture, literature, drawing, and installation art. Inspired by the implications of Deleuze and Guattari's work on difference and multiplicity and with a focus on the intersection of theory and practice, the book represents a major interdisciplinary contribution to Deleuze-Guattarian aesthetics. *Nineteenth-century German Writers to 1840*

James N. Hardin 1993 Profiles more than thirty German writers of the nineteenth century up to 1840, presenting primary and secondary bibliographies and illustrated biographical essays that chronicle each writer's career in detail.
