

Primary 5 English Exam Papers Hong Kong

Serving Library Users from Asia John Hickok 2019-06-12

Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers,

nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries

and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts

Angel M.Y. Lin 2016-09-15 This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from

both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually

positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.

Narratives of English Language Learners in

Private Tutoring Kevin Wai Ho Yung 2025-12-04 Yung offers a groundbreaking exploration of the dynamic interplay between motivation, private tutoring, and second language learning. Examining the under-researched topic of “shadow education” in the context of applied linguistics, this book provides a fresh and insightful outlook on the unique experiences of English as a second language (L2) learners engaged in English private tutoring. By examining L2 learners’ experiences from the perspective of the L2 motivational self, readers will gain valuable insights into how personal goals, identity, and aspirations drive learning

processes. The book features an in-depth analysis of L2 learners’ narratives, shedding light on the diverse factors that shape students’ L2 motivation in learning English in cram schools. Researchers, educators, policymakers, schoolteachers and tutors alike will benefit from the understanding of how private tutoring influences the development of learners’ L2 motivational selves, informing teaching strategies, policies and language learning approaches in both mainstream and shadow education settings. This book is a must-read for researchers in applied linguistics and educators and practitioners working with L2 learners seeking to understand the underpinnings of motivation in English language learning. With its unique focus on the private tutoring context, this book serves as a vital resource for those striving to optimise language learning experiences and outcomes within and outside school.

Hegemonies Compared Ting-Hong Wong 2002-04-24 This book explores the impact of cultural identity, the internal configurations of the educational field, and the struggles both inside and outside the educational systems of post-World War II Singapore and Hong Kong. By comparing the school politics of these two nations, Wong generates a theory that illuminates connections between state formation, education, and hegemony in countries with dissimilar cultural makeups.
