Core Concepts in Advanced Practice Nursing Denise L. Robinson 2001 Developed specifically for masters level nursing courses, this information-packed text addresses nearly all core content subjects of the graduate curriculum. It contains information on health care policy, organization of the health care delivery system, health care financing, ethics, professional role development, theoretical foundations of nursing practice, human diversity and social issues, and health promotion and disease prevention. Written by experts, each chapter includes an overview of the topic, definitions of relevant terms, review and history of the literature, critical issues, priorities for research, future directions, implications for advanced practice nursing, critical thinking activities, and suggestions for further learning.

Theories of Adolescence Rolf Eduard Helmut Muuss 1996 A renowned text, THEORIES OF ADOLESCENCE provides students with a concise, well written, illustrated and readable description of the essence of major theoretical positions (both historical and contemporary) about adolescence and about the phenomena of adolescence and development in general. This one-of-a-kind text focuses solely on the theories of adolescence, giving thorough coverage to all the major theories through 14 topic areas.

The Psychology of Personality Bernardo J. Carducci 2009-03-09 This engaging, comprehensive introduction to the field of personality psychology integrates discussion of personality theories, research, assessment techniques, and applications of specific theories. The Psychology of Personality introduces students to many important figures in the field and covers both classic and contemporary issues and research. The second edition reflects significant changes in the field but retains many of the special features that made it a textbook from which instructors found easy to teach and students found easy to learn. Bernardo Carducci's passion for the study of personality is evident on every page.

Learning Psychology Prof. Dr. Bilal Semih Bozdemir Learning psychology represents a critical intersection of psychology and education, offering insights into how individuals acquire, process, and retain knowledge. This chapter aims to elucidate the definitions and scope of learning psychology, establishing a strong foundation for the subsequent exploration of historical perspectives, theories, and applications. At its core, learning psychology focuses on understanding the mechanisms that underpin learning processes. Traditionally, learning has been defined as a relatively permanent change in behavior or knowledge resulting from experience. While this definition captures the essence of learning as a transformative process, it necessarily leaves room for exploration into the cognitive, emotional, and social dimensions that influence how learning occurs. Learning psychology encompasses a wide range of subfields, including cognitive psychology, developmental psychology, behavioral psychology, and educational psychology. Each of these domains contributes unique perspectives on how learning is conceptualized and operationalized. Cognitive psychology emphasizes the mental processes involved in learning, including perception, memory, and reasoning. This branch of psychology examines how individuals process information, solve problems, and apply knowledge in various contexts. In contrast, behavioral psychology focuses on observable behaviors and external stimuli, positing that learning occurs through conditioning processes—both classical and operant. These differing approaches highlight the multifaceted nature of learning, prompting further investigation into the interplay of cognitive, emotional, and environmental factors.

Human Learning Jeanne Ellis Ormrod 2008 Human Learning, fifth edition, is the leading text on learning theories applied to education. It covers a broad range of learning theories, including behaviorist, social cognitive, cognitive, and developmental. Complex learning and cognition, including metacognition, transfer,

and social processes in knowledge construction are also covered, as is motivation. Coverage demonstrates, through the author's extremely lucid and engaging prose, how different concepts relate to one another. The book provides dozens of proven examples, and emphasizes meaningful learning that makes the fundamentals of these theories comprehensible to students with little or no prior coursework in psychology. Key revisions to this book include a thoroughly updated section on behaviorism, a new, separate chapter on the developmental theories of Piaget and Vygotsky, and a reorganized motivation section.

The Spectrum of Addiction Laura J. Veach 2017-10-20 Reflecting the latest content in the DSM-5, The Spectrum of Addiction presents a comprehensive overview of addictive behaviors and habits from early use through risky use, severe-risk use, and addiction. Authors Laura Veach and Regina Moro draw from their experience in both teaching and counseling to provide real-world knowledge and evidence-based practices for working with clients who fall within the spectrum of addiction ranging from experimentation to physical addiction and recovery. With a unique focus on neuroscience, integration of CACREP standards, and extensive coverage of addictions across the lifespan, the book serves as a practical resource for future addiction counselors. The Spectrum of Addiction is part of SAGE's Counseling and Professional Identity Series.

Key Concepts in Developmental Psychology H Rudolph Schaffer 2006 Perfect for courses in child development or developmental psychology and arranged thematically in sections corresponding to chapter headings usually found in textbooks, this book is ideal for students wanting an accessible book to enrich their learning experience. Key Features: - Provides an overview of the place of each concept in Developmental Psychology under three headings, namely its meaning, origins and current usage. - Concepts are grouped into sections corresponding to the main themes usually covered in teaching. - Relevant concepts in the book are emboldened and linked by listing at the end of each concept - Guidance is provided to further reading on each of the concepts discussed. The book will be centrally important to undergraduate students who need to learn the language used by developmental psychologists in describing their studies, but will also help more advanced readers in checking their ideas regarding the nature and uSAGE of particular concepts.

An Educator's Guide to Student Motivation Allan C. Ornstein 2006 This guide provides teachers with theory, research, and practical suggestions for motivating students to engage in learning activities.
