Cumin, Camels, and Caravans Gary Paul Nabhan 2014-04-07 Gary Paul Nabhan takes the reader on a vivid and far-ranging journey across time and space in this fascinating look at the relationship between the spice trade and culinary imperialism. Drawing on his own family's history as spice traders, as well as travel narratives, historical accounts, and his expertise as an ethnobotanist, Nabhan describes the critical roles that Semitic peoples and desert floras had in setting the stage for globalized spice trade. Traveling along four prominent trade routes—the Silk Road, the Frankincense Trail, the Spice Route, and the Camino Real (for chiles and chocolate)—Nabhan follows the caravans of itinerant spice merchants from the frankincense-gathering grounds and ancient harbors of the Arabian Peninsula to the port of Zayton on the China Sea to Santa Fe in the southwest United States. His stories, recipes, and linguistic analyses of cultural diffusion routes reveal the extent to which aromatics such as cumin, cinnamon, saffron, and peppers became adopted worldwide as signature ingredients of diverse cuisines. *Cumin, Camels, and Caravans* demonstrates that two particular desert cultures often depicted in constant conflict—Arabs and Jews—have spent much of their history collaborating in the spice trade and suggests how a more virtuous multicultural globalized society may be achieved in the future. Handbook on Spices and Condiments (Cultivation, Processing and Extraction) H. Panda 2010-10-01 The term Spice and Condiments applies to natural plant or vegetable products or mixtures in whole or ground form, which are used for imparting flavour, aroma and piquancy to the food items. Spices and condiments are a major commercial crop in India, and earn a major part of foreign exchange annually. They have been the backbone of agricultural industry. The importance of spices and condiment in dietary, medicinal and other uses, and their commercial importance are immense. India is known the world over as the home of spices. Thus spices are an important group of agricultural goods, which are virtually indispensable in the culinary art. Spice processing includes different steps: spice cleaning, spice reconditioning and spice grinding. Some spices were also used for preserving food like meat for a year or more without refrigeration. In the 16th century cloves for instance were among the spices used to preserve food without refrigeration. Cloves contain a chemical called eugenol that inhibits the growth of bacteria. It is a natural antibiotic. It is still used to preserve food like Virginia Ham. Likewise later mustard and ground mustard were also found to have preservative qualities. India alone contributes 25-30 % of the total world trade in spices. It may be interesting to note that nine spices namely pepper ginger clove cinnamon cassia mace nutmeg pimento (allspice) and cardamom alone contributed as much as 90% of the total world trade. Pepper is the most important spice in the world and so also of India. This book basically deals with brief history of spices, uses of spices, world trade in spices area & production of spices in India, area and production of spices in India, major and minor spices of India, spice processing, quality issues with spices, bird chillies and Tabasco chillies, basil or sweet basil, seasoning blend duplication and tricks, sauces and gravies, snack seasonings, quality issues with spices, etc. This book is a single compendium which deals with all aspects and facts of spices and condiments which may meet the requirements of all those handling them at various stages, from harvesting to their end use. This book contains post harvest management, the potentials of genetic engineering, high production technology in spices with plantation and processing of various spices and condiments such as vanilla, turmeric, tamarind, saffron, black pepper, onion, mint, ginger, garlic, curry leaf, coriander etc.

Spice Roger Crowley 2024-04-09 The story of the sixteenth-century's epic contest for the spice trade, which propelled European maritime exploration and conquest across Asia and the Pacific Spices drove the

early modern world economy, and for Europeans they represented riches on an unprecedented scale. Cloves and nutmeg could reach Europe only via a complex web of trade routes, and for decades Spanish and Portuguese explorers competed to find their elusive source. But when the Portuguese finally reached the spice islands of the Moluccas in 1511, they set in motion a fierce competition for control. Roger Crowley shows how this struggle shaped the modern world. From 1511 to 1571, European powers linked up the oceans, established vast maritime empires, and gave birth to global trade, all in the attempt to control the supply of spices. Taking us on voyages from the dockyards of Seville to the vastness of the Pacific, the volcanic Spice Islands of Indonesia, the Arctic Circle, and the coasts of China, this is a narrative history rich in vivid eyewitness accounts of the adventures, shipwrecks, and sieges that formed the first colonial encounters—and remade the world economy for centuries to follow.

One Spice, Two Spice Floyd Cardoz 2006-10-24 Floyd Cardoz, chef and co-owner of New York City's Tabla restaurant, is one of the most exciting innovators working behind a stove today. And now, for the first time, he shares the extraordinary recipes that have established his reputation. In them Cardoz is able to make the quantum leap between the American palate and his taste memories—the food of his childhood in Bombay and Goa. The collection, *One Spice, Two Spice*, is an amalgam of two cuisines by a man who has mastered the flavors of each. This volume of more than 140 recipes is a gift to all home cooks who enjoy the flavors of India but are intimidated by the unusual and numerous spices required to prepare these dishes. Here, Cardoz renders those spices user friendly in a down-to-earth primer and glossary. Then, in the recipe notes, he shows you how to easily integrate these new flavors into everyday meals and dinner-party fare. The techniques—sautéing, panfrying, braising, poaching, and roasting—are not new. The results, however, are astonishing. Imagine crisp panfried black pepper shrimp, meaty sea scallops seared and served in a satiny sweet-sour glaze, asparagus and morels sautéed in a spicy blend of shallot, ginger, and chile—all of which can be made in no time flat. Other recipes—steak rubbed with crushed peppercorns and coriander, cumin, and mustard seeds, duck bathed in an aromatic orange curry, lamb meatballs filled with an herbaceous combination of fresh figs, cilantro, and mint and then napped with a lush, lustrous green sauce—may require more marinating or cooking time, but the trade-off is Cardoz's three-star-restaurant cooking at home. *One Spice, Two Spice* is more than a cookbook. It is a gateway to a different way of thinking about the food on your plate, and it brings Indian flavors into the modern American repertoire.

Spice Jack Turner 2008-12-10 In this brilliant, engrossing work, Jack Turner explores an era—from ancient times through the Renaissance—when what we now consider common condiments were valued in gold and blood. Spices made sour medieval wines palatable, camouflaged the smell of corpses, and served as wedding night aphrodisiacs. Indispensable for cooking, medicine, worship, and the arts of love, they were thought to have magical properties and were so valuable that they were often kept under lock and key. For some, spices represented Paradise, for others, the road to perdition, but they were potent symbols of wealth and power, and the wish to possess them drove explorers to circumnavigate the globe—and even to

savagery. Following spices across continents and through literature and mythology, *Spice* is a beguiling narrative about the surprisingly vast influence spices have had on human desire. Includes eight pages of color photographs. One of the Best Books of the Year: Discover Magazine, The Christian Science Monitor, San Francisco Chronicle
