Business Research Reporting Dorinda Clippinger 2017-12-05 Business Research Reporting addresses the essential activities of locating, collecting, evaluating, analyzing, interpreting, and reporting business data. It highlights the value of primary and secondary research to making business decisions and solving business problems. It aims to help business managers, MBA candidates, and upper-level college students boost their research skills and report research with confidence. This book discusses primary data collection, sampling concepts, and the use of measurement and scales in preparing instruments. Also, this book explores statistical and non-statistical analysis of qualitative and quantitative data and data interpretation (findings, conclusions, and recommendations). The author shows how to locate, evaluate, and extract secondary data found on the web and in brick-and-mortar libraries, including optimized searching, evaluating, and recording. Plus, the book demonstrates how to avoid copyright infringement and plagiarism, use online citation software, and cite sources when writing and presenting. Two glossaries—one each for primary and secondary research—round out the content. Business Research Reporting can be your go-to guidebook for years to come. Reading through it in a couple of hours, you can pick up ample information to apply instantly. Then keep it handy and refer to it in your ongoing research activities.

Managerial Economics K Rama Mohana 2023-08-08 Managerial Economics involves an analysis of the allocation of the resources available to a firm, or a unit of management among the activities of that unit. It makes use of concepts and theories of economics and assists managers to make rational decision. The present book emphasizes on conceptual clarity and simplified presentation. The book comprehensively covers all the aspects that impinge upon economic decision making of modern business units. Thus, allowing a great deal of flexibility in the choice of topics that any teacher or student may wish to cover. This text would be helpful for the students of Commerce, Management, Economics, Engineering, Law, and other social sciences disciplines. It is also useful to the practicing managers of various business units within and outside the country. The book integrates various concepts and ideas from the fields of economics and other subjects, which have bearing on managerial decision making and policy formulation within the business unit. It provides a number of suitable examples, including large number of review questions, objective type questions and exercises. The text focuses on the concepts related to macroeconomics and business decision, and modern approaches to managerial economics.

Schaum's Outline of Theory and Problems of Fluid Mechanics and Hydraulics Ranald V. Giles 1995 Giving comprehensive coverage of the fundamentals of fluid mechanics and hydraulics, this package uses free-body analysis, the principle of work and energy and of impulse-momentum and Newton's laws of motion throughout. Appendices of physical properties and coefficients provide resources.

Exploratory Data Analysis in Business and Economics Thomas Cleff 2013-11-12 In a world in which we are constantly surrounded by data, figures, and statistics, it is imperative to understand and to be able to use quantitative methods. Statistical models and methods are among the most important tools in economic analysis, decision-making and business

planning. This textbook, "Exploratory Data Analysis in Business and Economics", aims to familiarise students of economics and business as well as practitioners in firms with the basic principles, techniques, and applications of descriptive statistics and data analysis. Drawing on practical examples from business settings, it demonstrates the basic descriptive methods of univariate and bivariate analysis. The textbook covers a range of subject matter, from data collection and scaling to the presentation and univariate analysis of quantitative data, and also includes analytic procedures for assessing bivariate relationships. It does not confine itself to presenting descriptive statistics, but also addresses the use of computer programmes such as Excel, SPSS, and STATA, thus treating all of the topics typically covered in a university course on descriptive statistics. The German edition of this textbook is one of the "bestsellers" on the German market for literature in statistics.
