God and Nature Curtis L. Thompson 2012-03-29 Two scholars who embrace contemporary insights from science and religion give shape to a compelling account of God's relation to nature.

The Sacred Paths of the West Theodore M. Ludwig 1994 This text combines study of the dynamic historical development of each religious tradition with a comparative thematic structure. Students are encouraged to discover and explore the nature of religious experience by comparing basic themes and issues common to all religions, finding connections with their own personal experiences. By sensitively introducing descriptive material within a comparative thematic structure, this text helps students to understand how each religion provides, for its adherents, patterns and meanings that make up a full way of life (from Amazon).

The Sacred and the Profane Mircea Eliade 1959 Famed historian of religion Mircea Eliade observes that even moderns who proclaim themselves residents of a completely profane world are still unconsciously nourished by the memory of the sacred. Eliade traces manifestations of the sacred from primitive to modern times in terms of space, time, nature, and the cosmos. In doing so he shows how the total human experience of the religious man compares with that of the nonreligious. This book serves as an excellent introduction to the history of religion, but its perspective also encompasses philosophical anthropology, phenomenology, and psychology. It will appeal to anyone seeking to discover the potential dimensions of human existence. -- P. [4] of cover.

Eight Theories of Religion Daniel L. Pals 2006 Why do human beings believe in divinities? Why do some seek eternal life, while others seek escape from recurring lives? Why do the beliefs and behaviors we typically call "religious" so deeply affect the human personality and so subtly weave their way through human society? Revised and updated in this second edition, *Eight Theories of Religion* considers how these fundamental questions have engaged the most important thinkers of the modern era. Accessible, systematic, and succinct, the text examines the classic interpretations of religion advanced by theorists who have left a major imprint on the intellectual culture of the twentieth century. The second edition features a new chapter on Max Weber, a revised introduction, and a revised, expanded conclusion that traces the paths of further inquiry and interpretation traveled by theorists in the most recent decades. *Eight Theories of Religion, Second Edition*, begins with Edward Burnett Tylor and James Frazer--two Victorian pioneers in anthropology and the comparative study of religion. It then considers the great "reductionist" approaches of Sigmund Freud, Emile Durkheim, and Karl Marx, all of whom have exercised wide influence up to the present day. The discussion goes on to examine the leading challenges to reductionism as articulated by sociologist Max Weber (new to this edition) and Romanian-American comparativist Mircea Eliade. Finally, it explores the newer methods and ideas arising from the African field studies of ethnographer E. E. Evans-Pritchard and the interpretive anthropology of Clifford Geertz. Each chapter offers biographical background, theoretical exposition, conceptual analysis, and critical assessment. This common format allows for close comparison and careful evaluation throughout. Ideal for use as a supplementary text in introductory religion courses or as the central text in sociology of religion and courses centered on the explanation and interpretation of religion, *Eight Theories of Religion, Second Edition*, offers an illuminating treatment of this controversial and fascinating subject.

Baby, You are My Religion Marie Cartier 2014-09-11 *Baby, You Are My Religion* argues that American butch-femme bar culture of the mid-20th Century should be interpreted as a sacred space for its community. Before Stonewall—when homosexuals were still deemed mentally ill—these bars were the only place where many could have any community at all. *Baby, You are My Religion* explores this community as a site of a lived corporeal theology and political space. It reveals that religious institutions such as the Metropolitan Community Church were founded in such bars, that traditional and non-traditional religious activities took place there, and that religious ceremonies such as marriage were often conducted within the bars by staff. *Baby, You are My Religion* examines how these bars became not only ecclesiastical sites but also provided the fertile ground for the birth of the struggle for gay and lesbian civil rights before Stonewall.

Between Cultural Diversity and Common Heritage Silvio Ferrari 2016-04-15 Going beyond the more usual focus on Jerusalem as a sacred place, this book presents legal perspectives on the most important sacred places of the Mediterranean. The first part of the book discusses the notion of sacred places in anthropological, sociological and legal studies and provides an overview of existing legal approaches to the protection of sacred places in order to develop and define a new legal framework. The second part introduces the meaning of sacred places in Jewish, Christian and Islamic thought and focuses on the significance and role that sacred places have in the three major monotheistic religions and how best to preserve their religious nature whilst designing a new international statute. The final part of the book is a detailed analysis of the legal status of key sacred places and holy cities in the Mediterranean area and identifies a set of legal principles to support a general framework within which specific legal measures can be implemented. The book concludes with a useful appendix for the protection of sacred places in the Mediterranean region. Including contributions from leading law and religion scholars, this interesting book will be valuable to those in the fields of international law, as well as religion and heritage studies.
