Just the Facts, Ma'am Daniel Moyer 2001 Jack Webb (1920-82) will live on forever in the hearts of TV fans as the no-nonsense cop with Badge 714. His creation and portrayal of Joe Friday on Dragnet - and memorable lines such as Just the facts, ma'am - made him and the series a cult with frequent repeat showings on satellite and cable. Moyer and Alvarez, along with Jack's daughter Stacy, tell a riveting story of the man that is certain to delight all Dragnet fans. Also included are a Dragnet Dictionary of Terms, a chronology of Jack's life, and scores of rare photos.

Dragnet Nation Julia Angwin 2014-02-25 An investigative journalist offers a revealing look at how the government, private companies, and criminals use technology to indiscriminately sweep up vast amounts of our personal data, and discusses results from a number of experiments she conducted to try and protect herself.

Life by Algorithms Catherine Besteman 2019-05-23 Computerized processes are everywhere in our society. They are the automated phone messaging systems that businesses use to screen calls; the link between student standardized test scores and public schools' access to resources; the algorithms that regulate patient diagnoses and reimbursements to doctors. The storage, sorting, and analysis of massive amounts of information have enabled the automation of decision-making at an unprecedented level. Meanwhile, computers have offered a model of cognition that increasingly shapes our approach to the world. The proliferation of "roboprocesses" is the result, as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide-ranging volume, which features contributions from a distinguished cast of scholars in anthropology, communications, international studies, and political science. Although automatic processes are designed to be engines of rational systems, the stories in *Life by Algorithms* reveal how they can in fact produce absurd, inflexible, or even dangerous outcomes. Joining the call for "algorithmic transparency," the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance, medicine, education, housing, the workplace, food production, public space, and emotions—not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society. Contributors Catherine Besteman, Alex Blanchette, Robert W. Gehl, Hugh Gusterson, Catherine Lutz, Ann Lutz Fernandez, Joseph Masco, Sally Engle Merry, Keesha M. Middlemass, Noelle Stout, Susan J. A Legal Guide to Privacy and Data Security 2014

Smarter Than You Think Clive Thompson 2014-08-26 A revelatory and timely look at how technology boosts our cognitive abilities—making us smarter, more productive, and more creative than ever. It's undeniable—technology is changing the way we think. But is it for the better? Amid a chorus of doomsayers, Clive Thompson delivers a resounding "yes." In *Smarter Than You Think*, Thompson shows that every technological innovation—from the written word to the printing press to the telegraph—has provoked the very same anxieties that plague us today. We panic that life will never be the same, that our attentions are eroding, that culture is being trivialized. But, as in the past, we adapt—learning to use the new and retaining what is good of the old. *Smarter Than You Think* embraces and extols this transformation, presenting an exciting vision of the present and the future.

The Privacy Fix Robert H. Sloan 2021-10-21 Online surveillance of our behavior by private companies is on

the increase, particularly through the Internet of Things and the increasing use of algorithmic decision-making. This troubling trend undermines privacy and increasingly threatens our ability to control how information about us is shared and used. Written by a computer scientist and a legal scholar, *The Privacy Fix* proposes a set of evidence-based, practical solutions that will help solve this problem. Requiring no technical or legal expertise, the book explains complicated concepts in clear, straightforward language. Bridging the gap between computer scientists, economists, lawyers, and public policy makers, this book provides theoretically and practically sound public policy guidance about how to preserve privacy in the onslaught of surveillance. It emphasizes the need to make tradeoffs among the complex concerns that arise, and it outlines a practical norm-creation process to do so.

The Prophets Tell Their Own Story Elmer A. Leslie 1939

The Nation 1920

Drugs, Power, and Politics Carl Boggs 2015-12-03 This book explores the increasingly broad terrain of drugs in American society with an emphasis on politics. It begins with the War on Drugs initiated by President Richard Nixon in the early 1970s and extends to the current day with the vast power of the pharmaceutical industry (Big Pharma), expansion of global criminal syndicates, militarization of the drug war, and struggles between states and federal government over the legalization of marijuana. From the beginning, the drug war produced increasing authoritarian tendencies in American politics, visible not only in swollen national bureaucracies and burgeoning police functions, but in the rise of the largest prison-industrial complex in the world, a surveillance state, and the weakening of personal privacy and freedoms. At the same time, the legal drug system with some of the most profitable business operations anywhere has expanded to create a huge medical edifice, affecting the delivery of health care, development of modern psychology, evolution of the treatment industry, and many other areas of contemporary life, including the world of sports and recreation. Although prohibitionism remains very much alive, targeting a wide range of illicit drugs, today it is the hundreds of widely-marketed chemical substances sold by Big Pharma that result in some of the most serious health problems affecting society. This book explores the long historical trajectory of both the War on Drugs and the growth of Big Pharma, focusing on social outcomes and political consequences in the US and beyond.
