New Directions and Challenges in
Languages and Cultures in Australia

Giuseppe D’Orazi 2026-04-22 In this edited volume, D’Orazi, Hajek, Mullan, and Ohashi unveil the rich tapestry of language education across Australia’s diverse landscape. The contributors present various case studies and experimental practices that are transforming language learning in established European and Asian language programmes, as well as showcasing vital efforts to preserve and revitalise Aboriginal and Torres Strait Islander languages. First-hand accounts in the volume reveal how collaborative approaches are creating resilient, inclusive language programmes, and explore evidence-based strategies for sustainable language programme development. The insights into decolonised pedagogical approaches that honour Indigenous knowledge systems, the proposed frameworks for cross-institutional collaboration, and the solutions to common challenges faced by language educators in English-dominant countries everywhere, all provide a roadmap for

innovation applicable beyond Australian borders. An essential resource for language and culture educators, researchers, practitioners, and policymakers from applied linguistics and language, this volume also offers substantive theoretical advancements while simultaneously providing innovative pedagogical frameworks for those dedicated to addressing diverse learner demographics.

Liberal Arts Education and Colleges in East Asia

Insung Jung 2016-03-09 This book discusses liberal arts education and liberal arts colleges in the context of East Asia, specifically focusing on Japan, China and S. Korea where it has become an emerging issue in higher education in recent years. It first explores the development, concepts and challenges of liberal arts education

and liberal arts colleges in East Asia. It then delineates the implications of the best practices of selected liberal arts colleges inside and outside East Asia, and offers policy and pedagogical guidelines for the future of liberal arts colleges and programs in East Asia and beyond.

Preventing Problem Behaviors Bob Algozzine 2010-03-08 "A wonderful tool for administrators and teachers that offers child-centered resources and ideas to help our learners succeed, thereby making our classrooms more effective. I especially love the sample behavior reports, progress monitoring charts, and the self-monitoring chart. Helping students see that they are responsible for their actions and making them partners in their education are effective practices." —Megan M. Allen, Fourth-Grade Teacher Cleveland Elementary School, Tampa, FL Prevention is the key to a successful school behavior plan! In today's increasingly diverse PreK-12 classrooms, problem behaviors

can often interrupt instructional time and disrupt learning. Designed for 21st-century school leaders, administrators, behavior specialists, and classroom teachers, this research-based guide offers specific strategies and plans for preventing problem behavior at both the classroom and school level. Based on the premise that early response to problems can lead to better outcomes for students, the book's content is framed around four essential areas: foundations, intervention, collaboration, and evaluation. Within these areas, this accessible guide features: The latest information on the science and practice of prevention Reasons why conflict resolution, peer mediation, and bullying are essential to prevention Effective practices for teaching social skills to young children Proven techniques for implementing schoolwide positive behavior support Tools for using individual behavior plans to prevent problems Ideas for home-school and community partnerships and culturally responsible teaching

Critical strategies for monitoring student progress and evaluating prevention practices New, updated chapters, including information on preschool behavior support and RTI This valuable resource provides all the tools and strategies school leaders and teachers need to keep children focused on learning.

Proceedings of the Fourth International Congress on Mathematical Education M. Zweng 2012-12-06 Henry O. Pollak Chairman of the International Program Committee Bell

Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his

planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

Proceedings of the 19th International Conference of the Asia Association of Computer-Assisted Language Learning (AsiaCALL 2022) Vu Phi Ho Pham 2023-04-07
This is an open access book. We really appreciate

the contributions to the success of the 18th AsiaCALL from participants from the United States, Spain, Australia, Japan, South Korea, Austria, Indonesia, India, Philippines, Thailand, Bangladesh, Taiwan, Saudi Arabia, and Palestine, and Vietnam. We also acknowledge the efficient local organizers from Hoa Sen University who paid great efforts and time to run the 18th AsiaCALL International Conference online. Without you, such effective colleagues, AsiaCALL could not gain such good prestigious fame. AsiaCALL is honored and delighted to announce that AsiaCALL2022, the 19th International Conference of the Asia Association of Computer-Assisted Language Learning, will be held on November 26-27, 2022. It will be hosted by the Hanoi University of Industry (HaUI), Ha Noi, Vietnam, at 298 Cau Dien street, Bac Tu Liem district, Hanoi, Vietnam. The Conference will be hybrid - both virtual mode (delegates outside of VN) and face-to-face mode (local delegates). Aims and ScopeThe mission of

the AsiaCALL International Conference (AsiaCALL) is to give researchers, educators, and teachers from all over the world a place to share their teaching experience and classroom research. This is done through conferences and seminars. Selected full papers presented at the AsiaCALL International Conference will be published in the Conference Proceedings, and Journals with Open Access to share the participants' research, teaching experiences. Furthermore, ASIACALL is a place where its members can be able to network and share work and research interests with other professionals in the field to maintain collaboration and advocate the use of technology in your educational environments.

The Pivotal Problems of Education William Francis Cunningham 1957

Awesome Math Titu Andreescu 2019-11-13
Help your students to think critically and creatively through team-based problem solving instead of focusing on testing and outcomes.

Professionals throughout the education system are recognizing that standardized testing is holding students back. Schools tend to view children as outcomes rather than as individuals who require guidance on thinking critically and creatively. Awesome Math focuses on team-based problem solving to teach discrete mathematics, a subject essential for success in the STEM careers of the future. Built on the increasingly popular growth mindset, this timely book emphasizes a problem-solving approach for developing the skills necessary to think critically, creatively, and collaboratively. In its current form, math education is a series of exercises: straightforward problems with easily-obtained answers. Problem solving, however, involves multiple creative approaches to solving meaningful and interesting problems. The authors, co-founders of the multi-layered educational organization AwesomeMath, have developed an innovative approach to teaching mathematics that will enable educators to: Move

their students beyond the calculus trap to study the areas of mathematics most of them will need in the modern world Show students how problem solving will help them achieve their educational and career goals and form lifelong communities of support and collaboration Encourage and reinforce curiosity, critical thinking, and creativity in their students Get students into the growth mindset, coach math teams, and make math fun again Create lesson plans built on problem based learning and identify and develop educational resources in their schools Awesome Math: Teaching Mathematics with Problem Based Learning is a must-have resource for general education teachers and math specialists in grades 6 to 12, and resource specialists, special education teachers, elementary educators, and other primary education professionals.
