The modern field of topology draws from a diverse collection of core areas of mathematics. Much of basic topology is most profitably described in the language of algebra - groups, rings, modules, and ... The term "topology" also refers to a specific mathematical idea central to the area of mathematics called topology. Informally, a topology describes how elements of a set relate spatially to each other. Topology underlies all of analysis, and especially certain large spaces such as the dual of $L^1(\mathbb{Z})$ lead to topologies that cannot be described by metrics. Topological spaces form the broadest regime in ...
