The rising costs of postsecondary education present challenges

to maintaining college

affordability. Textbooks are an

important factor students need

to consider when calculating

the overall cost of attending

college. In an effort to ensure

that faculty and students have

sufficient information about

textbooks, Congress included

requirements in the Higher

Education Opportunity Act

(HEOA) concerning publisher

and school disclosures, as well

as publisher provision of

individual course materials.

This report addresses (1) the

efforts publishers have made to

provide textbook information to

faculty and make bundled

materials available for sale individually, and how these practices have informed faculty selection of course materials; and (2) the extent to which postsecondary schools have provided students and college bookstores access to textbook information, and what the resulting costs and benefits have been. Tables and figures. This is a print on demand report.

**A Multimodal and Ethnographic Approach to Textbook Discourse** Germán Canale 2022-08-30 This book offers a new framework for analysing textbook discourse, bridging the gap between contemporary ethnographic approaches and multimodality for a contextually sensitive approach which considers the multiplicity of multimodal resources involved in the production and use of textbooks. The volume makes the case for textbook discourse studies to go beyond studies of textual representation and critically consider the ways in which textbook discourse is situated within wider social

practices. Each chapter considers a different social semiotic practice in which textbook and textbook discourse is involved: representation, communication, interaction, learning, and recontextualization. In bringing together this work with contemporary ethnography scholarship, the book offers a comprehensive toolkit for further research on textbook discourse and pushes the field forward into new directions. This innovative book will be of particular interest to students and scholars in discourse analysis, multimodality, social semiotics, language and communication, and curriculum studies.
