*A Multimodal and Ethnographic Approach to Textbook Discourse* Germán  
Canale 2022-08-30 This book offers a new framework for analysing  
textbook discourse, bridging the gap between contemporary  
ethnographic approaches and multimodality for a contextually sensitive  
approach which considers the multiplicity of multimodal resources  
involved in the production and use of textbooks. The volume makes the  
case for textbook discourse studies to go beyond studies of textual  
representation and critically consider the ways in which textbook

discourse is situated within wider social practices. Each chapter  
considers a different social semiotic practice in which textbook and  
textbook discourse is involved: representation, communication,  
interaction, learning, and recontextualization. In bringing together this  
work with contemporary ethnography scholarship, the book offers a  
comprehensive toolkit for further research on textbook discourse and  
pushes the field forward into new directions. This innovative book will be  
of particular interest to students and scholars in discourse analysis,  
multimodality, social semiotics, language and communication, and  
curriculum studies.
