### **The Common Core Approach to Building Literacy in Boys** Liz Knowles 2014-05-27

Written with a focus on the English Language Arts Common Core Standards, this book provides a complete plan for developing a literacy program that focuses on boys pre-K through grade 12. Despite the fact that reading and literacy among boys has been an area of concern for years, this issue remains unresolved today. Additionally, the emphasis and focus have changed due to the implementation of the English Language Arts Common Core Standards. How can educators best encourage male students to read, and what new technologies and techniques can serve this objective? The Common Core Approach to Building Literacy in Boys is an essential resource and reference for

teachers, librarians, and parents seeking to encourage reading in boys from preschool to 12th grade. Providing a wide array of useful, up-to-date information that emphasizes the English Language Arts Common Core Standards, the bibliographies and descriptions of effective strategies in this book will enable you to boost reading interest and performance in boys. The chapters cover 16 different topics of interest to boys, all accompanied by a complete bibliography for each subject area, discussion questions, writing connections, and annotated new and classic nonfiction titles. Information on specific magazines, annotated professional titles, books made into film, websites, and apps that will help you get boys interested in reading is also included.

*Subjectivity in Asian Children's Literature and Film* John Stephens 2012-11-12 Winner of the Children's Literature Association Honor Book Award This volume establishes a dialogue between East and West in children's literature scholarship. In all cultures, children's literature shows a concern to depict identity and individual development, so that character and theme pivot on questions of agency and the circumstances that frame an individual's decisions and capacities to make choices and act upon them. Such issues of selfhood fall under the heading subjectivity. Attention to the representation of subjectivity in literature enables us to consider how values are formed and changed, how emotions are cultivated, and how maturation is experienced. Because subjectivities emerge in social contexts, they vary from place to place. This book brings together essays by scholars

from several Asian countries — Japan, India, Pakistan, Korea, Vietnam, Taiwan, Australia, Thailand, and The Philippines — to address subjectivities in fiction and film within frameworks that include social change, multiculturalism, post-colonialism, globalization, and glocalization. Few scholars of western children's literature have a ready understanding of what subjectivity entails in children's literature and film from Asian countries, especially where Buddhist or Confucian thought remains influential. This volume will impact scholarship and pedagogy both within the countries represented and in countries with established traditions in teaching and research, offering a major contribution to the flow of ideas between different academic and educational cultures.
