Advances in Production Management Systems
Ioannis A. Pappas 1993 Well-designed and well-
run systems for the management of production,
systems that take account of and use optimally
all technical and human potential, are
paramount for the competitiveness of industrial
business. Therefore, ... promotion of knowledge
and exchange of experience ... are important
ingredients of scientific and social progress... D.
Mavros, Chairman of the Board, Hellenic
Management Association (HMA), I. Kounelis,
Chairman, Administrative Committee, Institute
of Production Management, HMA. This
publication aims to bridge the gap between

research and industrial practice in production management systems. The contributions are therefore sourced from a wide range of specialists involved in the field, including production managers, production and materials management experts, logistic engineers, consulting and software experts and managers, researchers and members of the academic community.

PRINCE2® Guidelines for writing Project Initiation Documentation Rik Pennartz

2018-07-01 This document is written for educational purposes, for project managers who need to write a document with all agreements between the Project Board and the Project Manager. The PID, or Project Initiation Documentation is made during the Initiation Stage of a project, before actual design,

development and delivery is being done. The document is one of the main documents in the PRINCE2® method and is comparable to the Project Charter or Project Definition Document. *Project Appraisal Document on a Proposed Loan in the Amount of US \$5 Million to the Government of Colombia for a Peasant Enterprise Zones for Peace Project* 1998 *Biennial Report of the State Highway Commission of North Carolina* North Carolina State Highway Commission 1924 The Art of Managing Software Development People Paul Steven Licker 1985 This volume systematically describes the theory, practice and special challenges involved in managing computer programmers, exploring the wealth of information on software development management that managers can use to solve the unique problems of their industry. It examines such techniques of supervision as performance appraisal, communication, meetings, staffing and organizing human resources. It also

proposes solutions for improving the relationship between the firm and the software shop, and shows managers new career paths created by the information revolution.

Final Report of the Endline Impact Evaluation - Seva and Global Sight Initiative's Strengthening Capacity and Learning To Deliver Quality Eye Care (SCALE) Project (January - March 2020)

Kuldeep Singh 2021-04-07 Seva Foundation, a global non-profit eye care organization, established the Global Sight Initiative (GSI) to help end avoidable blindness. GSI, composed of more than 100 hospitals across 20 countries, promotes universal access to culturally appropriate, affordable, and high-quality eye care services. The purpose is to create self-sustaining, comprehensive eye care systems serving marginalized communities throughout the developing world. In January 2016, Seva partnered with Seeing Is Believing (SiB) to support the Global Sight Initiative (GSI)

intervention in India through the “SCALE: Strengthening Capacity and Learning to Effectively Deliver Quality Eye Care” (SCALE) project started in mid-2016. The project’s goal was to scale up comprehensive quality eye care services through capacity building, resulting in a direct increase in the restored sight of people. The SCALE project was completed in December 2019. The purpose of this endline impact evaluation study was to review the performance of the SCALE program vis-à-vis its objectives by analyzing the program data as reported by hospitals and presenting the perceived impact and feedback from the data collected through structured questionnaires and consultations with the mentee and mentor hospitals, as well as highlighting the suggested improvements. Analysis of the quantitative program data showed a remarkable performance for all objectives of the program, with inevitable scope for improvement. Feedback from hospital partners was promising, with all noting an

inclination to recommend the SCALE program to other hospitals in need of support. Based upon the overall understanding and assessment of the SCALE program, some crucial suggestions and recommendations emerged for future action in the areas of data collection and reporting, capacity building, gender inclusion, mentoring and support, cross-learning, monitoring and evaluation, and research and development, among others.

Convergence of Project Management and Knowledge Management T. Kanti Srikantiah 2010-11-16 Knowledge is power, but this is especially true for teams carrying out a project. As in other arenas, the effective use of knowledge is possible only if it is readily accessible, well organized, properly analyzed, and competently disseminated to meet the project needs. Knowledge gained from project failures or successes is vital for the long term sustainability of organizations to compete in the business environment. This book focuses on the

proper access and delivery methods for explicit knowledge in projects and also concentrates on tacit knowledge unknown and unavailable to most people in project environments. Every project is unique with start and end dates, detailed project plan, budget, schedule, human resources, and deliverables, and all these areas have a high volume of rich knowledge. Knowledge is created and flows through all nine project knowledge areas: Project Integration Management; Project Scope Management; Project Time Management; Project Cost Management; Project Quality Management; Project Human Resources Management; Project Communications Management; Project Risk Management; and Project Procurement Management. This book discusses the benefits of managing knowledge in projects and provides techniques that will increase the rate of return on projects. Addressing strategy and deployment issues, this volume also provides case studies, making this an invaluable tool for the success of

projects and sustainability/growth of organizations.
