The Demographic and Development Divide in India Sanjay K. Mohanty 2019-09-16 This book is the first-ever volume which provides comprehensive information on demographic, health and development at the level of 640 districts in India. Central and state governments, developmental organizations, national and international NGOs and researchers require disaggregated data at the district level for many practical purposes. However, such information is not readily available for use. The editors, with a close-knit group of collaborators, have compiled data from reliable sources for each district of India and present the results in the form of composite indexes. The chapters rank districts within the state and vis-à-vis all districts of India to help readers understand intra-district and inter-district developmental disparities. They present spatial analyses that depict clustering of development. It is a ready reference for planners, researchers and students and provides scientific analyses that depict the clustering of development parameters at the district level. This volume is meant for a wide readership interested in development in India, across population studies, sociology, economics, statistics, to regional development, and from academics, researchers, and planners to policy makers.

Drug Metabolism and Transport: The Frontier of Personalized Medicine, volume II Junmin Zhang

2025-10-31 This Research Topic is part of a series with:

<https://www.frontiersin.org/research-topics/44712/drug-metabolism-and-transport-the-frontier-of-personalized-medicine>. There are many unique challenges in personalizing drug therapy. Research on pharmacokinetics and pharmacodynamics of drugs is beneficial to ensure the safety and efficacy of clinical medication. There have been many advances in technology and drug model metrology in drug metabolism and transport studies, but our understanding of the factors that influence drug disposition and efficacy still needs to be refined. The purpose of this special issue is to report on factors influencing the pharmacokinetics of drugs, such as drug dosage forms, drug-drug interactions, metabolic enzymes, transporters, pharmacogenetic polymorphisms, pharmacomicrobiome, and specific environments, etc. It aims to standardize personalized medicine and promote clinical rational drug use. This Research Topic will include but is not limited, to reporting: - Effects of dosage form, dose, and route of administration on pharmacokinetics. - Pharmacokinetic alterations and mechanisms mediated by drug-drug interactions. - Mechanism of drug-metabolizing enzyme alterations mediated by external factors, such as high-altitude hypoxia. - Mechanism of drug transporter changes or gut microbiota mediated by external factors, such as high-altitude hypoxia or antibiotic. - Effects of gene polymorphisms of drug-metabolizing enzymes on drug action. - Research methods of intestinal drug transporters. - Effect of intestinal flora on drug metabolism. - Discovery of specific probes for drug-metabolizing enzymes. - Implications of drug interactions mediated by transporters or metabolizing enzymes for precision medicine.

*Phase I Oncology Drug Development* Timothy A. Yap 2020-09-16 This book provides a detailed review of how oncology drug development has changed over the past decade, and serves as a comprehensive guide

for the practicalities in setting up phase I trials. The book covers strategies to accelerate the development of novel antitumor compounds from the laboratory to clinical trials and beyond through the use of innovative mechanism-of-action pharmacodynamic biomarkers and pharmacokinetic studies. The reader will learn about all aspects of modern phase I trial designs, including the incorporation of precision medicine strategies, and approaches for rational patient allocation to novel anticancer therapies.

Circulating biomarkers to assess mechanisms of response and resistance are changing the way we are assessing patient selection and are also covered in this book. The development of the different classes of antitumor agents are discussed, including chemotherapy, molecularly targeted agents, immunotherapies and also radiotherapy. The authors also discuss the lessons that the oncology field has learnt from the development of hematology-oncology drugs and how such strategies can be carried over into therapies for solid tumors. There is a dedicated chapter that covers the specialized statistical approaches necessary for phase I trial designs, including novel Bayesian strategies for dose escalation. This volume is designed to help clinicians better understand phase I clinical trials, but would also be of use to translational researchers (MDs and PhDs), and drug developers from academia and industry interested in cancer drug development. It could also be of use to phase I trial study coordinators, oncology nurses and advanced practice providers. Other health professionals interested in the treatment of cancer will also find this book of great value.
