Khaled Elleithy 2007-06-06 The  
conference proceedings of:  
International Conference on  
Industrial Electronics,  
Technology & Automation  
(IETA 05) International  
Conference on  
Telecommunications and  
Networking (TeNe 05)  
International Conference on  
Engineering Education,  
Instructional Technology,  
Assessment, and E-learning  
(EIAE 05) include a set of  
rigorously reviewed world-class

manuscripts addressing and  
detailing state-of-the-art  
research projects in the areas  
of: Industrial Electronics,  
Technology and Automation,  
Telecommunications,  
Networking, Engineering  
Education, Instructional  
Technology and e-Learning.  
The three conferences, (IETA  
05, TENE 05 and EIAE 05)  
were part of the International  
Joint Conference on Computer,  
Information, and System  
Sciences, and Engineering  
(CISSE 2005). CISSE 2005, the  
World's first  
Engineering/Computing and  
Systems Research E-  
Conference was the first high-  
caliber Research Conference in  
the world to be completely  
conducted online in real-time  
via the internet. CISSE  
received 255 research paper  
submissions and the final  
program included 140  
accepted papers, from more  
than 45 countries. The whole  
concept and format of CISSE  
2005 was very exciting and  
ground-breaking. The  
powerpoint presentations, final  
paper manuscripts and time

schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants, so they could pick and choose the presentations they want to attend and think about questions that they might want to ask. The live audio presentations were also recorded and are part of the permanent CISSE archive, which includes all power point presentations, papers and recorded presentations. All aspects of the conference were managed on-line; not only the reviewing, submissions and registration processes; but also the actual conference. Conference participants - authors, presenters and attendees - only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. The on-line structure of this high-quality event allowed academic professionals and industry participants to contribute work

and attend world-class technical presentations based on rigorously refereed submissions, live, without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 50 countries, for whose researchers, this opportunity presented a much more affordable, dynamic and well-planned event to attend and submit their work to, versus a classic, on-the-ground conference. The CISSE conference audio room provided superb audio even over low speed internet connections, the ability to display PowerPoint presentations, and cross-platform compatibility (the conferencing software runs on Windows, Mac, and any other operating system that supports Java). In addition, the conferencing system allowed for an unlimited number of participants, which in turn granted CISSE the opportunity to allow all participants to attend all presentations, as opposed to limiting the number

of available seats for each session. The implemented conferencing technology, starting with the submission & review system and ending with the online conferencing capability, allowed CISSE to conduct a very high quality, fulfilling event for all participants. See:
