Blast, Corrupt, Dismantle, Erase Brett Josef Grubisic 2014-06-16 What do literary dystopias reflect about the times? In *Blast, Corrupt, Dismantle, Erase*, contributors address this amorphous but pervasive genre, using diverse critical methodologies to examine how North America is conveyed or portrayed in a perceived age of crisis, accelerated uncertainty, and political volatility. Drawing from contemporary novels such as Cormac McCarthy's *The Road*, Neil Gaiman's *American Gods*, and the work of Margaret Atwood and William Gibson (to name a few), this book examines dystopian literature produced by North American authors between the signing of NAFTA (1994) and the tenth anniversary of 9/11 (2011). As the texts illustrate, awareness of and deep concern about perceived vulnerabilities—ends of water, oil, food, capitalism, empires, stable climates, ways of life, non-human species, and entire human civilizations—have become central to public discourse over the same period. By asking questions such as “What are the distinctive qualities of post-NAFTA North American dystopian literature?” and “What does this literature reflect about the tensions and contradictions of the inchoate continental community of North America?” *Blast, Corrupt, Dismantle, Erase* serves to resituate dystopian writing within a particular geo-social setting and introduce a productive means to understand both North American dystopian writing and its relevant engagements with a restricted, mapped reality.

Collision of Realities Lars Schmeink 2012-05-29 Even though the fantastic (in its most inclusive definition) has been a part of our culture for as long as it exists, it has not been a prominent feature of European academic interest. With its inherent transgressive moment the fantastic allows for an ideal space of the cultural negotiation of political, social and

physical boundaries, which should place it at the center of popular cultural research, not as is the case, at its periphery. But the commencing boom of fantastic themes in contemporary media production has facilitated a paradigmatic change in research, prompting a wide interest in the fantastic in all its forms, from fantasy to horror, from fairy tale to science fiction. This volume addresses this growing interest by reviewing the status of research on the fantastic in Europe so far and by providing a necessary outlook for the future. In the essays current trends, such as the liminality debate, as well as established discourses, as for example on genre theory, are brought together to show interested researchers a network of interdisciplinary (from literary, media and social studies) approaches towards the fantastic.

Absent Rebels: Criticism and Network

Power in 21st Century Dystopian Fiction

Annika Gonnermann 2021-04-19 *Absent Rebels: Criticism and Network Power in 21st Century Dystopian Fiction* focuses on the relationship between literary dystopia, network power and neoliberalism, explaining why rebellion against a dystopian system is absent in so many contemporary dystopian novels. Also, this book helps readers understand modern power mechanisms and shows ways how to overcome them in our own daily lives.

Grain & feed journals 1930Bulletin 1902Reimagining Science Fiction Gary Westfahl

2025-10-24 In the first decades of the twenty-first century, science fiction literature has been transformed in many ways, as the genre has reacted to the dominating influence of films, television, and video games, the growing popularity of fantasy, the rise of young adult science fiction and graphic novels, the impact of the internet and social media, and the increasing diversity of the authors, characters, and often non-Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances, including analyses of how evolutionary psychology explains today's science fiction, the emerging subgenre of "cli-fi" exploring the effects of climate change, the use of science fiction in different areas of the college curriculum, and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford, and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy, and religion.

Worlds Gone Awry John J. Han 2018-08-22

Dystopian fiction captivates us by depicting future worlds at once eerily similar and shockingly foreign to our own. This collection of new essays presents some of the most recent scholarship on a genre whose popularity has surged dramatically since the 1990s.

Contributors explore such novels as *The Lord of the Flies*, *The Heart Goes Last*, *The Giver* and *The Strain Trilogy* as social critique, revealing how they appeal to the same impulse as utopian fiction: the desire for an idealized yet illusory society in which evil is purged and justice prevails.
