Designing Cost Management Systems to Support Business Decision-Making Pieter Buys 2021-07-19 This book illustrates the importance effective cost management systems in providing a supportive environment in which reliable and relevant management information can be generated. Such a cost management system is only attainable if the importance of key business, operational and stakeholder requirements are recognised within the organisational context. In illustrating this importance, this book provides several case studies as examples thereof. The first two case studies focus on the engineering sector and illustrates the development of a cost management system in a water recycling context; and the design of a budgetary system in a mining engineering context. The remaining case studies focus on the services sector, including cost management systems for a digital technology services provider and a medical insurance services provider; an alternative activity-based costing approach for a public sector services provider; and finally a re-designed value stream for an automotive services provider. Academic researchers and industry managers in the fields of management accounting and financial management, as well as engineering and operations management, will find value in the experiences described herein.

A Textbook of Cost and Management Accounting, 10th Edition Arora M.N. 2012 A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly, simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters. Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self test by students. This is an ideal book for self study. New to this edition • All chapters thoroughly revised • Latest information on Cost Accounting Standards (CAS) issued by the Institute of Cost Accountants of India (ICAI) • Chapter on 'Miscellaneous Topics' made more contemporary by including some new sub-topics, and thus re-named 'Advanced Cost Management Techniques' • Revision and augmentation of practical problems

Contemporary Accounting: A Strategic Approach for Users 10e Phil Hancock 2019-09-30 Now in its tenth edition, Contemporary Accounting: A Strategic Approach for Users is designed for one-semester introductory accounting courses at undergraduate or MBA level, for both accounting and non-accounting majors. The text has been updated throughout to strengthen the content for first-year students, and to integrate financial and management accounting. Associate Dean Phil Hancock (UWA) and Assistant Professor Peter Robinson (UWA) have worked together to add three new, online-only (MindTap) financial accounting chapters that bridge the gap between assumed and actual knowledge, and have redesigned the pedagogical features to make the text friendlier to first-year learners. It has also been appropriately updated for currency, including an extract from the Annual Report of Woolworths Limited for the year ending 30 June 2018 as an appendix. Premium online teaching and learning tools are available on the MindTap platform. Learn more about the online tools cengage.com.au/mindtap
