Encyclopedia of Leadership George R. Goethals 2004 'The Encyclopedia of Leadership' brings together everything that is known and truly matters about leadership as part of the human experience.

Handbook of Research on Educational Administration Joseph Murphy 1999-04-26 Over the past ten years, a variety of leadership theories and practices have both influenced and responded to widespread changes in education. This volume examines the technical, managerial, and institutional dimensions of leadership and shows how they relate to changing views of teaching and learning, to new forms of school organization and governance, and to shifting trends in the social and community climate of schooling.

The Leadership Quarterly 2002

Teaching Leadership Peter S. Temes 1996 Leadership studies is booming on American campuses, but many are skeptical - is this new field more than a gimmick to amuse students and woo donors? The authors of the essays in this volume are as skeptical as any critics of the field but they see hope for Leadership studies if the field can focus more on Leadership as a process of inquiry than as a set of techniques. They seek in these essays to restore the academic traditions of inquiry to the study of Leadership. They take risks, they criticize the sacred texts (like Burns' Leadership and Rost's 21st Century), and they make the signal contribution to the field this decade.

Leadership Robert N. Lussier 2022-02-14 Using current examples and step-by-step behavioral models, the Seventh Edition of Leadership: Theory, Application, and Skill Development equips your students with the leadership skills they need to thrive in today's business world.

Records and Information Management Patricia C. Franks 2025-02-24 Widely acknowledged as the benchmark text for both students and RIM

professionals ("extremely comprehensive and accessible," raves Archival Issues) the new third edition updates its authoritative blend of theory and practice to reflect the field's dynamically evolving environment, including the rapid rise of applications powered by AI/ML. Franks presents complete coverage of the records and information lifecycle model, encompassing paper, electronic (databases, office suites such as Microsoft 365, and email), and new media records (blogs, chat messages, and software as a service), while acknowledging the influence of emerging and developing technologies and encouraging new ways of meeting the resulting challenges. In this book, enhanced with supplemental contributions from a wide range of thought leaders and practitioners, readers will explore such key topics as the latest advances in disruptive technologies, including blockchain, Web3, the metaverse, and evolving digital communication tools such as enterprise social media; an overview of the origins and development of records and information management; the discipline of information governance and the steps to develop a strategic records and information management plan; a completely new chapter that demystifies data governance, automation, and AI; strategies for the creation/capture and classification of records and information; approaches to retention strategies, inactive records management, archives, and long-term digital preservation; methods for access, storage, and retrieval of records and information; insight into electronic records and electronic records management systems; practices for safeguarding essential records, including disaster preparedness, recovery, and business continuity; approaches to monitoring, auditing, privacy, security, and risk management; fresh discussion of the leadership and management skills required of RIM professionals; and expert guidance on trendspotting, education, and training.

Political Leadership and the Northern Ireland Peace Process Cathy Gormley-Heenan 2007-02-15 This book argues that much of the literature on political leadership has made little meaningful connection with the issues of peace, conflict and divided societies. In providing a critical interpretation of political leadership during the Northern Ireland peace process, Cathy Gormley-Heenan shows how the 'leadership lens' offers insights not offered by conventional analyses of peacemaking processes. Using interviews with political elites in Northern Ireland, the book discusses the confusions, contradictions and chameleonic nature of leadership and its role, capacity and effect.
