Kendrick Lamar and the Making of Black Meaning Christopher M. Driscoll 2019-09-25

Kendrick Lamar has established himself at the forefront of contemporary hip-hop culture. Artistically adventurous and socially conscious, he has been unapologetic in using his art form, rap music, to address issues affecting black lives while also exploring subjects fundamental to the human experience, such as religious belief. This book is the first to provide an interdisciplinary academic analysis of the impact of Lamar's corpus. In doing so, it highlights how Lamar's music reflects current tensions that are keenly felt when dealing with the subjects of race, religion and politics. Starting with Section 80 and ending with DAMN., this book deals with each of Lamar's four major projects in turn. A panel of academics, journalists and hip-hop practitioners show how religion, in particular black spiritualities, take a front-and-center role in his work. They also observe that his astute

and biting thoughts on race and culture may come from an African American perspective, but many find something familiar in Lamar's lyrical testimony across great chasms of social and geographical difference. This sophisticated exploration of one of popular culture's emerging icons reveals a complex and multi faceted engagement with religion, faith, race, art and culture. As such, it will be vital reading for anyone working in religious, African American and hip-hop studies, as well as scholars of music, media and popular culture.

The Cannabible Jason King 2011-04-13 A unique reference guide to the finest marijuana. Astounded by the lack of books dedicated to the wondrous variety of his favorite plant, author Jason King set out on a four-year mission to document the world's finest cannabis. Traveling around North America, Hawaii, and Europe, he captured over 1,500 strains on film (benevolently sampling a good number as well). Here in THE CANNABIBLE, images of the best

200 varieties are included alongside engaging and informative descriptions of their aromas, flavors, effects, and origins. Study this holy writ and figure out whether Purple Haze, Magic Kush, and the "P" is da kine or da shwag; learn which strains will give you the munchies or the wobbles; discover how appropriately named are Doc Kevorkian, Black Widow, and Cat Piss; and find out which strains are good for productivity, creativity, or just sitting on the couch, staring into space. With over 400 mind-blowing, full-color photographs of the world's most beautiful nugs, this book will have you on the floor, bowing to the mighty bud-dha.

Handbook of Cannabis Production in Controlled Environments Youbin Zheng

2022-06-29 For thousands of years, Cannabis sativa, commonly called cannabis or marijuana, has been used for many different purposes. Due to its enormous medicinal values, increasing numbers of countries and regions have started to legalise the cultivation of this plant. When grown commercially, cannabis is most often

produced in controlled environments including greenhouse and indoor growing rooms, to ensure consistent growth and high quality. Even for field production, propagation is frequently conducted in controlled environments. Commercial operations and individual growers who cultivate cannabis for personal consumption, require scientific information on how to cultivate cannabis most effectively and efficiently. To meet these needs, scientists have been conducting research on how to optimize cannabis cultivation both in small and large scales. Handbook of Cannabis Production in Controlled Environments is the result of collaborations between some leading cannabis scientists and highly experienced practitioners. Featuring full-color illustrations and photographs throughout, this book covers a broad range of topics include cannabis biology; science and techniques for breeding and propagation; management and optimization of both aerial and rootzone environments; plant

nutrition and nutrient disorder diagnosis; crop training and pest management; harvesting and post-harvest processing. Along with the basic aspects of controlled environment cannabis production, this book summarises developments in these areas that may challenge old beliefs and improve production. Led by Editor, Youbin Zheng, President of the Canadian Society for Horticultural Science/La Société Canadienne de Science Horticole, this book is a practical guide for cultivators, consultants, and researchers; a reference for students; and an information source for individuals who grow cannabis for personal consumption.
