Social Work with Immigrants and Refugees Elaine Congress 2008-10-27
"This book is an optimal tool for instructors and students of graduate classes in social work and related disciplines." --Journal of Immigrant and Minority Health "I applaud social work students, professors, and social workers who seek to serve and empower the immigrant community. This text is a great tool toward raising awareness of the many issues immigrants face, and helping them find solutions." --Frank Sharry, Executive Director, America's Voice "The book is a major contribution to social workers and their clients as it addresses advocacy on behalf of immigrants and refugees during a social, economic and political period that restricts immigrants' rights and service access." --Dr. Diane Drachman, Associate Professor, University of Connecticut School of Social Work
Successful social work with immigrants must begin with an understanding of their legal status and how that status impacts their housing, employment, health care, education, and virtually every other aspect of life. Chang-Muy and Congress present social workers with the only book on the market to emphasize the legal aspect of immigrant issues as well as critical practice and advocacy issues. Topics discussed include historical and current trends in immigration, applicable theories for practice with immigrants, policy and advocacy methods, and the need for cultural competence. By providing comprehensive coverage of both the legal and practice issues of this complex field, this book will help social service professionals and graduate students increase their cultural sensitivity and work more effectively with immigrants. Key Features: Covers the latest aspects of the immigration debate and discusses how social workers are affected by emerging immigration policies Discusses special populations such as refugees, elderly immigrants, and victims of international trafficking Includes case studies on the most critical issues immigrants face today: legal processes, physical and mental health

Teaching Technology in Libraries Carol Smallwood 2017-02-06 Libraries are charged with fostering new skills and capabilities, a challenging task in an era of rapid technological change. Developing new ways of teaching and learning--within budget and time constraints--is the key to keeping up-to-date. Written by librarians, this collection of new essays describes an array of technology outreach and instruction programs--from the theoretical to the practical--for public, academic and school libraries, based on case studies and discussions of methodology. Content includes out of the box lessons, outreach successes and technology instruction programs applicable to patrons and staff at public, academic and school libraries.

Cognitive Information Processing: Career Theory, Research, and Practice

V. Casey Dozier 2023-11-30 This book's aim is to improve the integration of Cognitive Information Processing (CIP) theory, research, and practice, leading to more cost-effective career interventions that help persons to make informed and careful career decisions over a lifetime. The starting point for the book's content was the 2004 Sampson, Reardon, Peterson, and Lenz book, *Career Counseling and Services: A Cognitive Information Processing Approach*, which itself was a revision of the 1991 Peterson, Sampson, & Reardon book, *Career Development and Services: A Cognitive Approach*. We had four goals for this edition of our book. Our first goal was to update the theory, research, and practice of CIP theory from 2004 through the end of 2022. Our second goal was to expand the authors to better reflect the diverse community of practice that has emerged for CIP theory over the past eighteen years. Our third goal was to remove cost as a potential barrier to disseminating knowledge about CIP theory by making the book accessible as an open-access publication through the Florida State Open Publishing. Finally, our fourth goal was to disseminate the book via open-source software available in libraries which can be used to make periodic book content updates more feasible.

Social Work with Immigrants and Refugees, Second Edition Fernando Chang-Muy 2015-10-08 Praise for the first edition: "This book is an optimal tool for instructors and students of graduate classes in social work and related disciplines." -Journal of Immigrant and Minority Health "This book is a major contribution to social workers and their clients as it addresses advocacy on behalf of immigrants and refugees during a social, economic, and political period that restricts immigrants' rights and service access." -Dr. Diane Drachman, Associate Professor, University of Connecticut School of Social Work "This text is a great tool toward raising awareness of the many issues immigrants face, and helping them find solutions." -Frank Sharry, Executive Director, America's Voice The leading textbook on social work with immigrants and refugees, this is the only book to address the intersection of legal, policy, and advocacy issues, in addition to the clinical skills needed to help these populations. This second edition has been updated to reflect key policy changes at the state and federal levels affecting social work with immigrants and refugees. The authors have expanded their coverage of transnationalism, microaggressions, and public health and community issues, and each chapter features updated case studies on the most critical issues immigrants face today: legal processes, physical and mental health issues, employment difficulties, family conflicts, and more. Key Features: Completely updated to reflect the latest developments in immigration law and policy Includes updated case studies, discussion questions, and abundant reference material Provides the multidisciplinary perspective of lawyers, social workers, clinicians, administrators, and academics Addresses issues specific to elderly immigrants, immigrant children, LGBT immigrants, and victims of international trafficking All-new appendix features sample questions asked at naturalization interviews

Risk and Resilience in Childhood Mark W. Fraser 1997 Research aims to understand the risks faced by children through treatment of the child's ecological environment and with a systems perspective. Risk factors identified include: attention deficiency and hyperactivity, school failure, drug use, early sexual activity, and childhood depression. The multisystems perspective argues that a conceptual frame of reference that incorporates individual and contextual conditions helps determine the probability of the problem, not identifying the risk after the fact.
