PROGRAMMABLE LOGIC CONTROLLER PEng. Emmanuel Pregrino Mgisha 2024-05-05 The programmable logic controller represents a key factor in industrial automation because, before programmable logic

controllers, manufacturing plants employed relay-based circuitry to energise different loads based on how the relays were wired together. The circuit patterns used for these drawings are known as ladder diagrams. Relays were costly, required constant maintenance, and could not be easily reconfigured. As PLCs took over this process, it was essential to maintain a similarity to the old system; thus, ladder logic was created as the first PLC programming language. Ladder logic is one of the top 5 most popular types of PLC programming languages used in various module syllabuses in various fields of Engineering courses, including Electrical, Electronics, Telecommunications, Mechanical, Mechatronics, Electromechanical, Oil and Gas, Ship Building and Marine Engineering, Pneumatic and Hydraulic Systems, to design various projects and systems in various areas, including domestic, residence, industrial systems, control of machinery, commercial, mining sector, aircraft, electric vehicles, marine automation, power stations, power substations, electric train and railway electrification systems, etc.

Programmable Logic Controllers Frank PETRUZELLA 2022

"Programmable logic controllers (PLCs) continue to evolve as new technologies are added to their capabilities. As PLC technology has advanced, so have programming languages and communications capabilities. Today's PLCs offer faster scan times, space efficient high-density input/ output systems, and special interfaces to allow non-traditional devices to be attached directly to the PLC. Now in its Sixth Edition, changes made to the content of the text have been made solely based on reviews from current instructors and include: material that should be added or deleted from chapters topics requiring more in-depth coverage increased integration of the ControlLogix platform of controllers chapter modifications require to meet current curriculum needs"--
