College Textbooks Melissa Emrey-Arras 2013-07-11 The rising costs of postsecondary education present challenges to maintaining college affordability. Textbooks are an important factor students need to consider when calculating the overall cost of attending college. In an effort to ensure that faculty and students have sufficient information about textbooks, Congress included requirements in the Higher Education Opportunity Act (HEOA) concerning publisher and school disclosures, as well as publisher provision of individual course materials. This report addresses (1) the efforts publishers have made to provide textbook information to faculty and make bundled materials available for sale individually, and how these

practices have informed faculty selection of course materials; and (2) the extent to which postsecondary schools have provided students and college bookstores access to textbook information, and what the resulting costs and benefits have been. Tables and figures. This is a print on demand report.

A Multimodal and

Ethnographic Approach to

Textbook Discourse Germán

Canale 2022-08-30 This book

offers a new framework for analysing textbook discourse,

bridging the gap between

contemporary ethnographic approaches and multimodality

for a contextually sensitive

approach which considers the multiplicity of multimodal

resources involved in the

production and use of

textbooks. The volume makes

the case for textbook discourse studies to go beyond studies of

textual representation and critically consider the ways in

which textbook discourse is situated within wider social

practices. Each chapter

considers a different social

semiotic practice in which

textbook and textbook

discourse is involved:

representation,

communication, interaction,

learning, and

recontextualization. In bringing

together this work with

contemporary ethnography

scholarship, the book offers a

comprehensive toolkit for

further research on textbook

discourse and pushes the field

forward into new directions.

This innovative book will be of

particular interest to students

and scholars in discourse

analysis, multimodality, social

semiotics, language and

communication, and

curriculum studies.
