A Multimodal and Ethnographic Approach to Textbook Discourse Germán

Canale 2022-08-30 This book offers a new framework for analysing

textbook discourse, bridging the gap between contemporary

ethnographic approaches and multimodality for a contextually sensitive

approach which considers the multiplicity of multimodal resources

involved in the production and use of textbooks. The volume makes the

case for textbook discourse studies to go beyond studies of textual

representation and critically consider the ways in which textbook

discourse is situated within wider social practices. Each chapter

considers a different social semiotic practice in which textbook and

textbook discourse is involved: representation, communication,

interaction, learning, and recontextualization. In bringing together this

work with contemporary ethnography scholarship, the book offers a

comprehensive toolkit for further research on textbook discourse and

pushes the field forward into new directions. This innovative book will be

of particular interest to students and scholars in discourse analysis,

multimodality, social semiotics, language and communication, and

curriculum studies.
