**A Multimodal and Ethnographic Approach
to Textbook Discourse** Germán Canale

2022-08-30 This book offers a new framework
for analysing textbook discourse, bridging the
gap between contemporary ethnographic
approaches and multimodality for a contextually

sensitive approach which considers the
multiplicity of multimodal resources involved in
the production and use of textbooks. The volume
makes the case for textbook discourse studies to
go beyond studies of textual representation and
critically consider the ways in which textbook
discourse is situated within wider social
practices. Each chapter considers a different
social semiotic practice in which textbook and
textbook discourse is involved: representation,
communication, interaction, learning, and
recontextualization. In bringing together this
work with contemporary ethnography
scholarship, the book offers a comprehensive
toolkit for further research on textbook
discourse and pushes the field forward into new
directions. This innovative book will be of
particular interest to students and scholars in

discourse analysis, multimodality, social semiotics, language and communication, and curriculum studies.
