A Multimodal and

Ethnographic Approach to Textbook Discourse Germán

Canale 2022-08-30 This book

offers a new framework for analysing textbook discourse, bridging the gap between contemporary ethnographic approaches and multimodality for a contextually sensitive approach which considers the multiplicity of multimodal resources involved in the production and use of textbooks. The volume makes the case for textbook discourse studies to go beyond studies of textual representation and critically consider the ways in which textbook discourse is situated within wider social practices. Each chapter considers a different social semiotic practice in which textbook and textbook

discourse is involved:

representation,

communication, interaction,

learning, and

recontextualization. In bringing together this work with

contemporary ethnography scholarship, the book offers a

comprehensive toolkit for

further research on textbook

discourse and pushes the field

forward into new directions.

This innovative book will be of

particular interest to students

and scholars in discourse

analysis, multimodality, social

semiotics, language and

communication, and

curriculum studies.
