Building a Mobile App with AngularJS 1 and Ionic 2015 Creating hybrid mobile applications is a great way to leverage your knowledge of web languages like HTML5, CSS, and JavaScript. Modern frameworks such as AngularJS and Ionic make it easier with pre-built

templates and components. In this course, staff author Ray Villalobos shows how to install the Ionic framework and set up a development environment suitable for building web-based apps. He reviews the core Ionic components: prebuilt, easy-to-use features such as buttons, lists, tabs, and forms. Then Ray shows how to combine these components with Angular.js models, views, and controllers to build a single page app with sliders, pull-to-refresh functionality, and search. The training culminates in building a multi-page app, which you'll learn how to customize with CSS.
