Engineering in K-12 Education National Research Council 2009-09-08
Engineering education in K-12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects—science, technology, and mathematics. Specifically, engineering education may improve student learning and achievement in science and mathematics, increase awareness of engineering and the work of engineers, boost youth interest in pursuing engineering as a career, and increase the technological literacy of all students. The teaching of STEM subjects in U.S. schools must be improved in order to retain U.S. competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues. *Engineering in K-12 Education* reviews the scope and impact of engineering education today and makes several recommendations to address curriculum, policy, and funding issues. The book also analyzes a number of K-12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn engineering-related concepts and skills. *Engineering in K-12 Education* will serve as a reference for science, technology, engineering, and math educators, policy makers, employers, and others concerned about the development of the country's technical workforce. The book will also prove useful to educational researchers, cognitive scientists, advocates for greater public understanding of engineering, and those working to boost technological and scientific literacy.

Astronomy Media Workbook Michael C. LoPresto 2007 This revised and expanded popular media workbook is provided with all new copies of Bennett's book and includes a wide selection of in-depth activities using resources from *The Astronomy Place* and *Voyager: SkyGazer*, College Edition v3.6 planetarium software. These thought-provoking projects are suitable for the lab or as assignable homework assignments.

Investigations in Number, Data, and Space 2008 Part of a K-5 mathematics curriculum, with curriculum units for classroom use and resources for teachers; the *Investigations* curriculum was developed at TERC, formerly Technical Education Research Centers.
