Current Trends in Nigerian Pidgin English

Akinmade T. Akande 2021-10-25 This book focuses on the structure and sociolinguistics of Nigerian Pidgin English. Its major aim is to serve as a compendium which touches different major aspects of NPE as it has been observed that earlier works in this area have focused only on one aspect or the other. It will offer a broad survey of the form and functions of Nigerian Pidgin (NP) in different domains. The book promises to investigate the use of NP in such domains as popular culture, advertisement, social media and online discussion fora. One major strong point of this volume is the fact that it will direct attention to different fertile areas of NP by focusing, inter alia, on its social functions,

its morphology and syntax, its regional varieties, its (possible) use as a viable medium of instruction in school, the changing attitudes of people towards its use, the place of NP in relation to language planning and policy in Nigeria as well as sociolinguistic variation within NP. The book will make a significant contribution to the existing literature on NP as, unlike earlier studies in this area, it will explore the grammatical, sociolinguistic and perceptual aspects of the language. By bringing together the expertise of renowned Nigerian and international scholars who have conducted research in this area, the volume will be an essential resource for researchers, graduate and undergraduate students interested not only in Nigerian Pidgin but also on contact linguistics. Fusion Foodways of Africa's Gold Coast in the Atlantic Era James D. La Fleur 2012-08-03

As most people in Atlantic-era West Africa—as in contemporary Europe and the Americas—were farmers, fields and gardens were the primary terrain where they engaged the opportunities

and challenges of nascent globalization.

Agricultural changes and culinary cross-currents from the Gold Coast indicate that Africans engaged the Atlantic world not with passivity but as full partners with others on continents whose histories have enjoyed longer, and greater, scholarly attention. The most important 'seeds of change' are not to be found in the DNA of crops and critters carried across the seas but instead in the creativity and innovation of the people who engaged the challenges and opportunities of the Atlantic World.
