Economic Development and Inequality in China Hong Yu 2011 The conventional belief that all regions have equally benefited from China's remarkable development over the last three decades is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post-1978 period using the case of Guangdong. Guangdong is one of the key industrial centres and economic powerhouses in China and as a pioneer province, instigating economic reform as China opened up to the world, it offers an ideal focus upon which to question and enrich the Western theories of economic geography and regional disparity. Based on field research, analysis of geographic characteristics and regression models, this book illustrates how Guangdong's impressive development record has been marred by its rising regional disparity, investigates the main causes of this disparity, and draws conclusions regarding the lessons China can learn from it. Economic Development and Inequality in China will be of interest to students and scholars of Chinese economics, Chinese regional studies, economic geography and China Studies. Hong Yu is a Visiting Research Fellow at the National University of Singapore. His research interests lie in the field of regional economy. He is the author of a chapter on China's two delta regions in the book "China and The Global Economic Crisis."

**The Idea of Poverty** Paul Spicker 2007-01-10 Paul Spicker examines views about what poverty is and what should be done about it. 'Poverty' means many different things to different people - for example, lack of money or dependency on benefits. Here, he makes an argument for a participative, inclusive understanding of the term.

**Dictionary of Contemporary Chinese Economics** Hong Yinxing 2025-05-26 This Dictionary provides the theoretical summary and conceptual framework around the milestones obtained through Chinese reform and development and highlights the research achievements of Chinese economics over the past 40 years. It also presents Chinese economics to the world, featuring the Belt and Road Initiative and the Chinese theory and Chinese system to be known and shared internationally with a Chinese intellectual foundation. It sets out to frame the theoretical achievements of extraction and summary of practice experience from Chinese reform and development. The choice of entries in the Dictionary seeks to embody the very Chinese characteristics of economics and the combination of theory and practice is illuminated. Furthermore, the dictionary explores examples of scientific achievements that traditional economics has brought forward and how they fit and unify within both a Chinese, as well as an international context.

**Tourists, Migrants & Refugees** Milica Zarkovic Bookman 2006 This book is unique in expertly linking three populations tourists, migrants, and refugees and forcing the reader to face the dilemmas and opportunities each poses for development in poor countries. Linda Richter, Kansas State University As travelers increasingly seek out the exotic wildlife and idyllic sunsets of the developing world, a complex relationship involving tourism, the migration of workers, and the involuntary displacement of peoples has emerged. Milica Bookman explores that relationship and the connection between population movements and economic development in third world countries. Bookman's multicountry analysis demonstrates forcefully that tourism both induces migration and displacement and is enabled by them, in a self-reinforcing circular flow. These population movements, she argues, likewise are both a cause and effect of economic growth. They are not, however, a panacea for developing countries. Throughout her study, Bookman underscores the human costs of tourism-led development, emphasizing the need for greater attention to the social dislocations that it brings about. Milica Z. Bookman is professor of economics at St. Joseph's University. She is author of eight books, including *Ethnic Groups in Motion* and *The Demographic Struggle for Power*, and is the recipient of the Tengelmann Award for Excellence in Teaching and Research. Contents: Introduction. Growth and Population Movements in Tourist-Friendly Countries. Tourists and Other Travelers. Migrants and Immigrants. Refugees and Internally Displaced Peoples. The Circular Flow of Populations and the Global Economy.

Economic Development Michael P. Todaro 2020-03-09 Economic Development, the leading textbook in this field, provides your students with a complete and balanced introduction to the requisite theory, driving policy issues, and latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies, to show how theory relates to the problems and prospects of developing countries. The Development Economics Reader Giorgio Secondi 2008 This book draws together the most authoritative articles on development economics published in the past few years, is aimed at undergraduate level and is suitable for students with little or no background in economics. The main themes include poverty, foreign aid, agriculture and human capital and amongst those whose work appears cannot be counted Amartya Sen, Jeffrey Sachs, Jagdish Bhagwati, Joseph Stiglitz, Paul Romer, Dani Rodrik, William Easterly, Robert Barro, Kenneth Arrow, Hernando de Soto, Daron Acemoglu, Muhammad Yunus, Anne Krueger, Abhijit Banerjee, Esther Duflo, Michael Kremer and Martin Feldstein. The reader focuses on the most recent and up-to-date contributions to the field of development economics. Instead of collecting "classic" contributions which are already available through many sources the articles chosen reflect recent developments in the discipline (for instance, in the area of geography and development) and include contributions that address recent events (the dramatic resurgence of a debt relief movement). "The Development Economics Reader" should be an invaluable resource for all students of the discipline.

**Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa** Teshager Alemu, Kassa 2018-02-09 Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. Improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent's development. The Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa provides emerging research on the strategies required to promote growth in Africa as well as the implications and issues of the expansion of prosperity. While highlighting sustainable education, pastoral development pathways, and the public-sector role, readers will learn about the history of sustainable development and governmental approaches to improving Africa's economy. This publication is a vital resource for policy makers, research institutions, academics, researchers, and advanced-level students seeking current research on the theories and applications of development in societal and legal institutions.

**When Helping Hurts** Steve Corbett 2009-06-24 Churches and individual Christians typically have faulty assumptions about the causes of poverty, resulting in the use of strategies that do considerable harm to poor people and themselves. When Helping Hurts provides foundational concepts, clearly articulated general principles and relevant applications. The result is an effective and holistic ministry to the poor, not a truncated gospel. A situation is assessed for whether relief, rehabilitation, or development is the best response to a situation. Efforts are characterized by an "asset based" approach rather than a "needs based"

approach. Short term mission efforts are addressed and economic development strategies appropriate for North American and international contexts are presented, including microenterprise development.

**The New Political Economy of Emerging Europe** László Csaba 2007 In this second, revised, and extended edition, the evolution of emerging Europe is analyzed against the background of major changes in the constitutional, fiscal, regional, and neighborhood policies of the European Union. The book provides an overview of the economic challenges in the post-transition period when the Communist past is no longer a defining feature of development. Interpreting successes and failures in a single analytical frame, the book is devoted to the new agenda faced by middle income countries in the double challenge of globalization and Europeanization. It analyzes if, when, and to what degree joining the European Union provides a solution, and how new members can contribute to the Lisbon Strategy of the EU. The book finds that solid finances, reliance on foreign direct investment, public policies committed to the public purpose rather than to vested interest, and impartial regulation and enforcement of rule of law are among the major components of success. It also

**Peacebuilding and Sustainable Human Development** Ayesah Uy Abubakar 2019-01-07 This book presents the protracted right to self-determination conflict between the Philippine state and the Bangsamoro group in Mindanao, Philippines. In the five decades of attempts to achieve peace, a key element is the Bangsamoros' search for a kind of development that is compatible with their aspirations for freedom and their future. This book presents a study of the Bangsamoro communities and their social constructions of conflict, peace and development. It examines the viability of the sustainable human development framework for application in their challenging realities. The usefulness of the sustainable human development framework lies not only in its use of human development parameters like the Human Development Index. It also provides an approach towards development that synergizes with the sustainable peace framework - an imperative for Mindanao. At the centre of this approach is the Participatory Rural Appraisal and Participatory Learning and Action methodology for eliciting responses, stimulating discussion, documenting verbal and non-verbal ideas and carrying out small-scale projects to demonstrate community participation. The book concludes with two main points: that (a) both sustainable human development and peacebuilding are mutually reinforcing frameworks aimed at achieving the same human development goals, and (b) the pursuit of the right to self-determination is enhanced, as both frameworks are combined to provide a context for the attainment of peace in Mindanao.

**Rule of Law Reform and Development** M. J. Trebilcock 2009-01-01 Rule of Law Reform and Development stands out as an important contribution. Michael Trebilcock and Ronald Daniels have produced an ambitious, comprehensive, and persuasive book that will be of interest to both rule of law practitioners and academics. . . the book's overall strengths as a near-encyclopaedic appraisal of law and development will ensure its standing as a key resource for this still rapidly evolving field. Irina Ceric, Canadian Journal of Law and Society This book offers a sophisticated yet pragmatic account of the proper purposes of rule of law reform, the obstacles to achieving it, and the role that the international community can play. The procedural conception of the rule of law offers an appealing alternative to both one-size-fits-all universalism on the one hand and unconstrained relativism on the other. Kevin Davis, New York University School of Law, US This is the book that I have been waiting for. Even though rule of law has become the new mantra in development, its meaning remains elusive and its operational content unclear. This book helps us think systematically about it. Grounded in a procedural conceptualization of the rule of law, and supported by detailed case studies, Trebilcock and Daniels analysis lays out a theoretically sophisticated, yet practical agenda for making progress with rule-of-law reforms. Dani Rodrik, Harvard University, US This is a book on the role of legal institutions in economic development that is rich in institutional analysis and nuanced in terms of sensitivity to social, historical and political-economy issues that arise in the implementation of the rule of law. I particularly value its major focus on the need for balance between independence and accountability that afflict any rule of law reform: a balance which is missing in more one-sided accounts in the literature. I believe the book will be widely read and appreciated. Pranab Bardhan, University of California, Berkeley, US Within the law and development literature it is the most knowledgeable and

comprehensive book on legal reform. I think that it will find a grateful readership among people working in development agencies, in humanitarian organizations and among scholars and students of development studies. Hans-Bernd Schäfer, University of Hamburg, Germany By identifying the key politico-economic reasons why rule-of-law reforms in developing countries have faltered and drawing out the implications for future strategy, this book is of immense importance and should be widely read. Anthony Ogus, CBE, FBA, University of Manchester, UK This important book addresses a number of key issues regarding the relationship between the rule of law and development. It presents a deep and insightful inquiry into the current orthodoxy that the rule of law is the panacea for the world's problems. The authors chart the precarious progress of law reforms both in overall terms and in specific policy areas such as the judiciary, the police, tax administration and access to justice, among others. They accept that the rule of law is necessarily tied to the success of development, although they propose a set of procedural values to enlighten this institutional approach. The authors also recognize that states face difficulties in implementing this institutional structures and identify the probable impediments, before proposing a rethink of law reform strategies and offering some conclusions about the role of the international community in the rule of law reform. Reviewing the progress in the rule of law reform in developing countries, specifically four regions Latin America, Africa, Central and Eastern Europe, and Asia this book makes a significant contribution to the literature. It will be of great interest to scholars and advanced students, as well as practitioners in the field, including international and bilateral aid agencies working on rule of law reform projects, and international and regional non-governmental organiza

**Growth and Economic Development** P. Arestis 2007-01-01 . . . this volume is a very good and important addition to economic growth and development. On the basis of authority, the selection is well-balanced. . . This book should be a mandatory textbook for graduate students in development economics, and essential reading for all policy-makers. Voxi Heinrich Amavilah, Progress in Development Studies This valuable and engaging new book bears eloquent testimony to A.P. Thirlwall's substantial contribution to economics over the last 40 years. The volume does not attempt to provide a comprehensive review of such a prolific figure, but rather demonstrates the considerable influence that his work on economic theory has had on his contemporaries, and the profession as a whole. From his early pioneering research in regional and labour economics to his more recent exploration of growth and development economics, leading experts in the field bear witness to the significant role he has played in the evolution of the discipline. In addressing some of the most pivotal aspects of his career, the contributors cover a range of topics including Thirlwall's Law, the application of Keynesian macroeconomic approaches, the General Theory within open economies, the connection between short-run cycles and long-run growth, endogenous growth theory, the Stability and Growth Pact, as well as broader development issues and problems. In championing Thirlwall's challenging work, this volume provides a lively and comprehensive account of some of the most important areas of economics today. This book will prove an essential read for academics and policy makers alike who are interested in trade, growth and development economics.

*Economic Development* Michael P. Todaro 2006 Todaro and Smith believe that development economics should foster a student's ability to understand real problems faced by developing countries. Unlike other texts, Economic Development introduces economic models within the context of countries and issues, so that students learn to analyze and engage in the ongoing policy debates. Praised for its even, balanced coverage, the text helps students to evaluate issues using the best available cross-sectional data, economic theory, and institutional and structural perspectives. Keeping pace with current data and events, the Ninth Edition includes the latest research in development as well as extensive country-specific examples of topics such as transition economics and urban policy. - Reorganization from four parts to three provides a more streamlined sequencing for economic development courses. - All new country case studies target pertinent issues, such as Divergent Development: Pakistan and Bangladesh and Understanding a Development Miracle: China. Thoroughly updated and revised comparison case studies provide the most current illustrations of policy and its outcomes. major development organizations. - New research on rural development economics and the green revolution in Chapter 9. - Extended coverage of non-governmental

organizations and how they compare with government and private sectors in Chapter 11, Political Economy and the Roles of Market. - Chapter 14 takes a critical look at the World Bank and the burden of debt.
