JSON (JavaScript Object Notation) is a lightweight format that is used for data interchanging. It is based on a subset of JavaScript language (the way objects are built in JavaScript). As stated in the MDN, ... May 11, 2013 · Here I'm creating a JavaScript object and converting it to a JSON string, but `JSON.stringify` returns "`[object Object]`" in this case, instead of displaying the contents of the object. JSON is used a lot for application data and configuration settings, so comments are necessary now. The "official spec" is a nice idea, but it's insufficient and obsolete, so too bad. Minify your JSON if you're ... Do standards or best practices exist for structuring JSON responses from an API? Obviously, every application's data is different, so that much I'm not concerned with, but rather the "response Of course,

the correct MIME media type for JSON is `application/json`, but it's necessary to realize what type of data is expected in your application. For example, I use Java Ext GWT and the server ... Here the message contains single quotation mark, which is same as the quotation used in JSON. What I do is fill up a string from user inputs such as message. So, I need to escape those kind of special ... I have saved a JSON file in my local system and created a JavaScript file in order to read the JSON file and print data out. Here is the JSON file: `{"resource":"A","literal...` I've never used JSON before so I'm not familiar with its syntax. At the moment I have multiple arrays containing different pieces of data. I would like to create one JSON object, that contains the Sep 4, 2020 · Note: This won't prettify the json representation. To do so, one can previously rely on an
